Ican Insight 2014:

Insight Turkey 2015 - Fall 2015 (Vol. 17, No. 4) , Last year was the year of elections in Turkey with two parliamentary elections and months long electoral campaigns that dominated the political agenda of the country The parliamentary elections of June 7 2015 brought an end to the AK Party s 12 year long era of parliamentary majority and single party government in Turkey Nevertheless the endeavors to form a coalition government could not be concluded successfully and another election appeared on the horizon The country was ruled by an AK Party led interim government and the elections were repeated five months later on November 1 2015 While close in time the two elections were quite distant with regard to the political contexts in which they were carried out and in their respective results The November elections witnessed a comeback for the AK Party which increased its votes by over 9 points with the addition of five million new votes in the ballot box **Insight Turkey 2018 - Winter 2018 (Vol. 20, No.1)** , Today the world system is in a transition and experiencing a deep international crisis The U S has begun to oppose the basic international institutions such as the United Nations and its subsidiary organs and specialized agencies even though most of these were established with American motivation The hegemon state the U S has been alienating most of its partners and even allies The U S governments have begun to focus on the national setting and to underestimate the international one to favor unilateral policies over multilateral ones The presidency of Donald Trump has expedited this process American rejection of providing global public goods such as international security and free trade has led to a systemic crisis The relative decline of American power coincides with the persistent rise of China Those who claim that the days of Pax Americana are numbered assert that the rise of China will determine the future of the world system China has begun to expand its influence worldwide For this purpose it has established alternative political and economic international institutions such as the Shanghai Cooperation Organization SCO and the Asian Infrastructure Investment Bank AIIB Furthermore China leads the establishment of some other international organizations as well BRICS is only one of these formations challenging the political hegemony of the West led by the U S One of the most promising Chinese projects is the One Belt One Road OBOR Project aspiring to connect the East China to the West the world markets It is expected that on its completion the OBOR Project will take China to the center of the world economy and politics China has been the fastest growing economy in the world for the last thirty years Its share of the world trade has increased dramatically recording the highest share in world exports for several years China has been enjoying economic transactions with all major international actors with more than 200 partners in exports and imports However in terms of per capita income China still lags behind the advanced Western countries Furthermore according to the calculations made by the World Bank and IMF Chinese per capita income is still lower than the world average China recently began to invest in the political and military sphere in the non Western world It has military bases in its near abroad and in the African continent That is Chinese economic influence and technological leadership is supported by its political and military power In

spite of the increase in Chinese military and political might it is careful not to challenge the U S and the West There are several reasons for this policy First of all China is aware of its vulnerabilities It suffers some economic and political inconsistencies and weaknesses For instance it has to fortify its regional dominance first in the South China Sea and achieve its longtime one China policy as a precondition for a possible global hegemony Second China wants to win the global rivalry without resorting to war with the current hegemon Therefore Chinese leaders refrain from opposing the American hegemony politically Even though it has introduced some international institutions the Chinese leadership does not propose a political and diplomatic alternative to the West It will take time for China to offer a full scale global leadership alternative to the world since the global hegemony requires not only economic and military power but also values and norms for cultural hegemony Lastly China is not ready to take the global responsibility since it brings high costs As long as the current American hegemony works in favor of China there is no need for China to change the course of its development In the light of these developments this issue of Insight Turkey focuses on some of the most important topics related to China s persistent rise in the international system More specifically this issue postulates on how to read and understand China s policies towards global powers i e the U S and Russia and regional powers i e India and Turkey Africa has once again returned to the attention of the global powers after being left for many years in the shadow of western politics In recent years Africa has become the center of China s public economic and military diplomacy As it may be expected China s investments in Africa are not totally welcomed by the U S Earl Conteh Morgan in his commentary focuses on the strategic rivalry between China and the U S in Africa Conteh Morgan argues that their rivalry has progressed from mild to intense with both powers increasing their activities on the continent and decreasing Africa s erstwhile marginalization Another rivalry that shapes China s foreign policies in the region is that with India Especially since the Doklam Plateau incident in mid 2017 the expectation of a possible tension between the two regional powers is ever present Taking this into consideration Bruno Ma es in his commentary ponders the economic and strategic rivalry between China and India along with a number of dimensions infrastructure border disputes sea power and trade

Insight Turkey 2015 - Spring 2015 (Vol. 17, No. 2) , Energy security at the heart of energy policy has become central to the dynamics of international relations Political turmoil has overwhelmed many oil and gas producing countries forcing them to adapt their national energy policies according to this continuous change Specifically because of the wars and instability in the Middle East and the Ukrainian crisis global energy security is no longer guaranteed One of the foremost experts on the energy industry Daniel Yergin identifies energy security as the availability of sufficient supplies at affordable prices He also comments that every country interprets the definition of energy security with its own dynamics In practice the definition of energy security is polysemic and the topic of energy security is being explored daily under the lens of numerous new studies by scholars energy experts government officials activists and journalists

Insight Turkey 2017 - Spring 2017 (Vol. 19, No.2) , The Spring 2017 issue of Insight Turkey aims at analyzing some of the most

debated issues during the 15 years rule of the AK Party Foreign and domestic policies political economy Turkey EU relations and the Kurdish issue are among the topics discussed in this issue *Insight Turkey 2016 - Winter 2016 (Vol. 18, No. 1)* , Germany who challenged the British and its allies twice in the first half of the 20th century began to reemerge as a global political power and to play the big game in the wake of the Cold War As the strongest economy and the most crowded country in the European Union EU Germany has decided to lead the EU institutions and the old continent in global platforms Especially after the reunification of the country Germany started to dominate European politics With the collapse of the Soviet Union and the end of Cold War politics Germany prompted the European countries to pursue a more independent foreign policy Getting rid of the Soviet threat Germany no longer needs NATO and the U S protection As a result we see a Germany which has initiated a multidimensional and multilateral foreign policy orientation in order to improve its worldwide national interests *Insight Turkey 2015 - Winter 2015 (Vol. 17, No. 1)* , Religion religious groups and politics are always most vital topics of the Western politics The relationship between politics and religion is reciprocal While both domestic and international political actors try to exploit religion and religious sensitivity for their political interests and gains religion and belief systems want to use significant power over main political and cultural actors and perceptions With the emergence of the violent non state actors such as Taliban al Qaeda and DAISH which were all surfaced in the Middle East but have become transnational actors deeply affecting European politics and the recent popularity of far right Islam phobic movements such as PEGIDA in Europe have once again forced us to look closely at the relationship between religion and politics in Western politics specifically in Europe Even though it is generally perceived that the religion has lost its war against politics in Europe as European countries have established secular democracies based on the promotion of individual freedoms and pluralism it is an undisputable fact that the general framework in European states is largely affected by the Christian values and often its imprints are seen in politics The developments around the recent large scale immigration toward Europe from Middle East and Africa are the reasons which force us to make this bold statement How Europe deals with mostly Muslim immigrants who come from very different ethnic and cultural backgrounds from European values is very alarming After unsuccessful assimilation and or integration efforts for these non European and non Christian immigrants state and societal actors have instigated to take restrictive measures against further immigration and migrants Furthermore we have started to witness strong wave of xenophobia and Islamophobia in these democratic European societies Islamophobia relations with European Muslims and implications of political developments in the Muslim World will significantly influence the future religion state relations in European countries However for the last few months we have been spectators of the tragic death of thousands desperate immigrants at the Mediterranean Sea who were trying to reach Europe Unfortunately the European countries have done nothing to prevent their death MUH TT N ATAMAN **A Clinical Introduction to Psychosis** Johanna C. Clinical Manual of Cultural Psychiatry Russell F. Lim,2015-04-01 The interaction of culture and mental illness is the focus of the Clinical Manual of Cultural Psychiatry which is designed to help mental health clinicians become culturally competent and skilled in the treatment of patients from diverse backgrounds The product of nearly two decades of seminar experience the book teaches clinicians when it is appropriate to ask Is what I am seeing in this patient typical behavior in his or her culture The ability to see someone else s worldview is essential for working with ethnic minority and culturally diverse patients and the author who designed the course that was this handbook s precursor has expanded the second edition to take into account shifting demographics and the changing culture of mental health treatment The content of the new edition has been completely updated expanded to include new material and enhanced by innovative features that will prove helpful for mental health clinicians as they encounter diverse patient populations The new chapter on women reflects the fact that mental health disparities extend beyond ethnic minorities Women have significantly higher rates of posttraumatic stress disorder and affective disorders for example yet research on women has been limited largely to the relationship between reproductive functioning and mental health Two new chapters address the alarming number of unmet mental health needs that lesbian gay bisexual and transgender patients suffer from These chapters emphasize the need for mental health providers and policy makers to remedy these disparities A new chapter has been added to help clinicians determine the role religious and spiritual beliefs play in psychological functioning because religious and spiritual beliefs have been found to

have both positive and negative effects on mental health The newly introduced DSM 5 Cultural Formulation Interview CFI is addressed in the book s introduction and is included in its entirety along with an informant module 12 supplementary modules and guidelines for their use in a psychiatric assessment In addition the reader has access to videotaped examples using simulated patients to illustrate practical application of the DSM 5 Outline for Cultural Formulation and CFI Extensive information on ethnopsychopharmacology reviewing clinical reports of ethnic variation with several different classes of psychotropic medications and examining the relationship of pharmacogenetics ethnicity and environmental factors to pharmacologic treatment of minorities The book updates coverage of African American Asian American Latino Hispanic and Native American Alaskan Native cultures as they relate to mental health issues while retaining the nuanced approach that was so effective in the first edition Course tested and DSM 5 compatible throughout the Clinical Manual of Cultural Psychiatry is a must read for clinicians in our diverse era Internal Audit Practice from A to Z Patrick Onwura

Nzechukwu,2016-11-25 This book addresses the practice of internal auditing using GAAS Generally Accepted Auditing Standards GAGAS Generally Accepted Government Auditing Standards and International Standards for the Professional Practice of Internal Auditing Standards as enunciated by the IIA Unique in that it is primarily written to guide internal auditors in the process and procedures necessary to carry out professionally accepted internal audit functions it includes everything necessary to start complete and evaluate an internal audit practice simplifying the task for even non professionals

Lubkin's Chronic Illness Larsen,2017-12 Lubkin s Chronic Illness Tenth Edition is an essential text for nursing students who seek to understand the various aspects of chronic Illness affecting both patients and families Important Notice The digital edition of this book is missing some of the images or content found in the physical edition Revolutionary Approach to International Law Eric Yong Joong Lee,2023-06-02 This book brings together critical legal analyses of ongoing global

issues in the digital age by international lawyers in Asia Digital revolution is the key to understanding the contemporary human society In this book the authors critically redefine the mainstream thinking and ideas of contemporary international legal issues that the global community is facing Given the rapidly shifting global legal landscape and framework they shed light on the theoretical and practical questions in international law and reexamine their global context Such independent and forward looking approach suggests the ideas to shaping the global common good in the future human society In both theory and practice this book is a useful guide to Asian law politics economy and business providing a fair and balanced point of view Places in Need Scott W. Allard,Scott Allard,2017-06-20 Americans think of suburbs as prosperous areas that are relatively free from poverty and unemployment Yet today more poor people live in the suburbs than in cities themselves In Places in Need social policy expert Scott W Allard tracks how the number of poor people living in suburbs has more than doubled over the last 25 years with little attention from either academics or policymakers Rising suburban poverty has not coincided with a decrease in urban poverty meaning that solutions for reducing poverty must work in both cities and suburbs

Allard notes that because the suburban social safety net is less developed than the urban safety net a better understanding of suburban communities is critical for understanding and alleviating poverty in metropolitan areas Using census data administrative data from safety net programs and interviews with nonprofit leaders in the Chicago Los Angeles and Washington D C metropolitan areas Allard shows that poor suburban households resemble their urban counterparts in terms of labor force participation family structure and educational attainment In the last few decades suburbs have seen increases in single parent households decreases in the number of college graduates and higher unemployment rates As a result suburban demand for safety net assistance has increased Concerning is evidence suburban social service providers which serve clients spread out over large geographical areas and often lack the political and philanthropic support that urban nonprofit organizations can command do not have sufficient resources to meet the demand To strengthen local safety nets Allard argues for expanding funding and eligibility to federal programs such as SNAP and the Earned Income Tax Credit which have proven effective in urban and suburban communities alike He also proposes to increase the capabilities of community based service providers through a mix of new funding and capacity building efforts Places in Need demonstrates why researchers policymakers and nonprofit leaders should focus more on the shared fate of poor urban and suburban communities This account of suburban vulnerability amidst persistent urban poverty provides a valuable foundation for developing more effective antipoverty strategies *Handbook of Research on Teaching* Drew Gitomer,Courtney

Bell,2016-05-19 The Fifth Edition of the Handbook of Research on Teaching is an essential resource for students and scholars dedicated to the study of teaching and learning This volume offers a vast array of topics ranging from the history of teaching to technological and literacy issues In each authoritative chapter the authors summarize the state of the field while providing conceptual overviews of critical topics related to research on teaching Each of the volume s 23 chapters is a canonical piece that will serve as a reference tool for the field The Handbook provides readers with an unaparalleled view of the current state of research on teaching across its multiple facets and related fields **Equity-Based Career Development and**

Postsecondary Transitions Erik M. Hines,Laura Owen,2022-03-01 Former First Lady Michelle Obama believes that every individual should have some type of postsecondary education or training beyond high school to achieve economic and personal success Reach Higher Initiative Better Make Room 2019 Educational attainment e g a high school diploma college degree or postsecondary training provides career opportunities for advancement into leadership positions and benefits such as health insurance and retirement Heckman 2000 Additionally an individual with a college degree can make over one million dollars more over a lifetime in salary than someone with a high school diploma Carnevale Cheah Hanson 2015 Acquiring a college degree can lead to employment opportunities and is considered an asset in the U S economy Washington 2010 However certain populations encounter barriers to attaining an education particularly a postsecondary education leading to a disparity in receiving the aforementioned benefits Some of these populations include African American students LGBTQ

students and students with disabilities There is a dearth of information and research on providing guidance on implementation research and best practices in equity based career development college readiness and successful postsecondary transitions for minoritized at risk or vulnerable populations The editors of this volume invited authors with research and practice expertise around various student populations in preparing them for college and career readiness as well as postsecondary transitions This book is the first of its kind to discuss career development and postsecondary transitions from an access and equity perspective Further this text serves as a call to action to ensure the United States most vulnerable populations has an opportunity to successfully transition into multiple postsecondary options after high school

Martin Rochester,2016-02-19 This book looks at the evolving relationship between war and international law examining the complex practical and legal dilemmas posed by the changing nature of war in the contemporary world whether the traditional rules governing the onset and conduct of hostilities apply anymore and how they might be adapted to new realities War always messy has become even messier today with the blurring of interstate intrastate and extrastate violence How can the United States and other countries be expected to fight honourably and observe the existing norms when they often are up against an adversary who recognizes no such obligations Indeed how do we even know whether an armed conflict is underway when modern wars tend to lack neat beginnings and endings and seem geographically indeterminate as well What is the legality of anticipatory self defense humanitarian intervention targeted killings drones detention of captured prisoners without POW status and other controversial practices These questions are explored through a review of the United Nations Charter

Geneva Conventions and other regimes and how they have operated in recent conflicts Through a series of case studies including the U S war on terror and the wars in Afghanistan Iraq Gaza Kosovo and Congo the author illustrates the challenges we face today in the ongoing effort to reduce war and when it occurs to make it more humane
