*Cross-Border Provision of Air Navigation Services with Specific Reference to Europe* Niels van

Antwerpen, 2008-05-16 The tremendous flow of air traffic traversing the airspace of the European Union demands extraordinary vigilance on the part of air navigation service providers. Although the first requirement of air navigation services is obviously the enhancement of safety, providers must also attend to the efficiency and optimisation of airspace capacity and the minimisation of air traffic delays. As technological and operational improvements proceed in these areas, jurisdictional issues of responsibility and liability, particularly in cases of mid-air collisions, become ever sharper and more in need of precise definition. This detailed and insightful exposition focuses on these issues from three overlapping perspectives: the international and European legal framework dealing with air navigation services; the question of state responsibility; and the question of liability for damage inflicted by air navigation service providers. The author's in-depth analysis includes examination of many elements among them: the following: the interrelated roles of the International Civil Aviation Organization (ICAO), the European Civil Aviation Conference (ECAC), the European Organisation for the Safety of Air Navigation (EUROCONTROL), the European Community's European Aviation Safety Agency (EASA) and other international bodies; the Single European Sky initiative; its establishment of Functional Airspace Blocks (FUAs) and its ongoing research program SESAR; establishment of transparent lines of state responsibility in the context of cross-border provision of air navigation services; and prospects for the imposition of a transparent liability regime on corporatized air navigation service providers. In conclusion, the author enumerates the essential elements required for cross-border provision of air navigation services and offers well-thought-out final recommendations and conclusions on the most preferable way to pursue such cross-border provision within and outside the European Community. A model agreement for the delegation of air navigation service provision appears as an appendix. All professionals concerned with air navigation in Europe and elsewhere will appreciate the depth of knowledge and commitment apparent in this book. The deeply informed insights manifest in its pages will be of enormous value to aviation agency officials and air law practitioners everywhere.

Routledge Handbook of Public Aviation Law Paul Stephen Dempsey, Ram Jakhu, 2016-07-15 The Routledge Handbook of Public Aviation Law is the first book to incorporate a comprehensive analysis of Public Aviation Law principally international but also domestic law in a comparative context in a single volume. International Law is pervasive in Aviation Law and is incorporated into a number of major multilateral treaties, e.g. the Chicago Convention of 1944 for Public International Air Law. This is supplemented by various Annexes promulgated by the International Civil Aviation Organization and Conventions and Protocols promulgated by States in diplomatic conferences. States then implement these international obligations in domestic laws that create aviation regulatory administrations that in turn promulgate regulations. Bringing together leading scholars in the field, this prestigious reference work provides a comprehensive and comparative overview of Public Aviation Law. It surveys the state of the discipline including contemporary and emerging areas of law, regulation and public policy in air transportation. Each chapter begins with an overview of the international law applicable to the subject matter followed where appropriate by a

comparative examination of domestic statutes regulations and jurisprudence The objective of the book is to identify and summarize existing areas within the context of international research and to identify and highlight emerging areas Both practical and theoretical in scope the Routledge Handbook of Public Aviation Law will be of great relevance to scholars researchers lawyers and policy makers with an interest in aviation law
