Islam, Modernity and a New Millennium Ali Paya, 2018-02-02 As the world becomes increasingly globalised Islam faces some important choices Does it seek to modernise in line with the cultures in which it is practised or does it retain its traditions even if they are at odds with the surrounding society This book utilizes a critical rationalist viewpoint to illuminate many of the hotly contested issues in modern Islam and to offer a fresh analysis A variety of issues within Islam are discussed in this book including Muslims and modernity Islam Christianity and Judaism approaches to the understanding of the Quran Muslim identity and civil society doctrinal certainty and violent radicalism In each case the author makes use of Karl Popper s theory of critical rationalism to uncover new aspects of these issues and to challenge post modern relativist literalist and justificationist readings of Islam This is a unique perspective on contemporary Islam and as such will be of significant interest to scholars of Religious Studies Islamic Studies and the Philosophy of Religion

Proceedings of the 5th China Aeronautical Science and Technology Conference Chinese Aeronautical Society, 2021-11-02 To sort out the progress of aviation science and technology and industry look forward to the future development trend commend scientific and technological innovation achievements and talents strengthen international cooperation promote discipline exchanges encourage scientific and technological innovation and promote the development of aviation the Chinese Aeronautical Society holds a China Aviation Science and Technology Conference every two years which has been successfully held for four times and has become the highest level largest scale most influential and authoritative science and technology conference in the field of aviation in China The 5th China Aviation Science and Technology Conference will be held in Wuzhen Jiaxing City Zhejiang Province in 2021 with the theme of New Generation of Aviation Equipment and Technology with academician Zhang Yanzhong as the chairman of the conference This book contains original peer reviewed research papers from the conference The topics covered include but are not limited to navigation guidance and control technologies key technologies for aircraft design and overall optimization aviation test technologies aviation airborne systems electromechanical technologies structural design aerodynamics and flight mechanics other related technologies advanced aviation materials and manufacturing technologies advanced aviation propulsion technologies and civil aviation transportation The papers presented here share the latest discoveries on aviation science and technology making the book a valuable asset for researchers engineers and students

Climate Smart Development in Asia Ancha Srinivasan, Frank Hiroshi Ling, Hideyuki Mori, 2013-07-03 The future of China India and Asia s other emerging economies and their ability to take a low carbon and climate resilient development path determine the future of global carbon emissions and climate change Indeed the battle to confront global climate change will be won or lost in Asia The transition to a low carbon climate resilient economy LCE which involves many steps towards improved energy efficiency alternative energy sources and

transport systems sustainable land use eco friendly consumption and proactive adaptation may be regarded as the world's fourth revolution after the industrial revolution agricultural revolution and the information revolution Asia is highly vulnerable to impacts of climate change Yet because of its dynamic economies and massive populations Asia offers the greatest opportunity for overcoming the trade offs and pursuing low carbon development pathways With a growing consensus that there is limited time to avoid the worst impacts of climate change scientists engineers policymakers and economists across Asia have recently begun discussions on how Asia can make a transition to LCE Most discussions however focused on transfer of technologies from developed to developing countries and overlooked other equally important challenges such as financing governance and information dissemination This book is the first to look at these neglected aspects of LCE and attempt to integrate both market based and technology based solutions into a comprehensive strategy to creating a roadmap for LCE in Asia This book is an essential reading for economists policy makers practitioners engineers and researchers concerned with climate change energy production and development in Asia and the impacts and potential for the world

Bradbury,F. Durst,B.E. Launder,F.W. Schmidt,J.H. Whitelaw,2012-12-06 The Fourth International Symposium on Turbulent Shear Flows took place at Karlsruhe University in Germany The papers presented at this Symposium encompassed a similar range to that of the previous meetings with greater emphasis placed on experimental work and continued a trend towards the examination of complex flows Once again three dimensional recirculating and reacting flows featured strongly in the programme and were complemented by consideration of two phase flows and discussions of both numerical and experimental techniques The Symposium brought together some 300 participants from all over the world and it was evident that there is a need for Turbulent Shear Flows Symposia in order to obtain and communicate new information useful to researchers in the field of

turbulent flows and of interest to engineers who design flow equipment This volume contains 27 papers selected from more than 100 presentations at the Symposium which have been reviewed and edited before publication Together they provide an indication of the status of current knowledge on the subjects represented at the Symposium They are grouped into four sections namely Fundamentals Free Flows Boundary Layers Reacting Flows As in previous volumes in this series each section begins with an introductory article considering the papers which follow in the broader context of available literature and current research

Technological Choices for Sustainability Subhas K. Sikdar, Peter Glavic, Ravi Jain, 2013-03-09 This book was made possible by the exceptional support provided by NATO Scientific and Environmental Division University of Maribor Slovenia Government of the Republic of Slovenia British and the United States Embassies Ljubljana the Republic of Slovenia The authors as listed in this book took the time to prepare excellent manuscripts focusing on various issues related to technological choices for sustainability These manuscripts were rigorously reviewed and refereed by scientists and engineers before inclusion in this book An introductory chapter was prepared to provide an overview and to integrate technical issues covered in the book A summary chapter is included at the end that provides a synthesis of panel discussions related to the three main sections of the book The editors are most grateful to the contributors sponsor organizations and many colleagues who were kind enough to assist us in making this book possible We are particularly grateful to Damjan Krajnc of the University of Maribor for compiling all the manuscripts in the correct format creating the index and assuring that all the contents are faithfully presented in this volume Background information about the editors and principal authors and contributors to this book follows

International Aerospace Abstracts, 1998 *EUROSHOCK - Drag Reduction by Passive Shock Control* Egon Stanewsky, Jean Delery, John Fulker, Wolfgang Geißler, 2013-04-17 It has been recognized by the European Union EU that the survival of the Aeronautical Industries of Europe in the highly competitive World Aviation Market is strongly dependent on such factors as time to market of a new or derivative aircraft and on its manufacturing costs but also on the achievement of a competitive technological advantage by which an increased market share can be gained Cooperative research is therefore continuously encouraged and co-financed by the European Union in order to strengthen the scientific and technological base of the Aeronautical Industries thus facilitating the future design and manufacture of civil aircraft products and providing the technological edge needed for survival Targets of research within Area 3 Aeronautics of the Industrial and Materials Technology Programme 1991-1993 have been identified to be aircraft efficiency cost effectiveness and environmental impact Concerning aircraft efficiency relevant to the present research a reduction in aircraft drag of 10% a reduction in aircraft fuel consumption of 30% and a reduction in airframe engine and system weight of 20% are envisaged Meeting these objectives has of course also a strong positive impact on the environment In order to further technology the philosophy is to avoid spreading the available resources too thinly and rather concentrate on the feasibility demonstration of a limited number of technologies of high economic and industrial impact

Universities

and the Public Sphere Brian Pusser, Ken Kempner, Simon Marginson, Imanol Ordorika, 2012-05-22 Universities have been propelled into the center of the global political economy of knowledge production by a number of factors mass education academic capitalism the globalization of knowledge the democratization of communication in the era of the Internet and the emergence of the knowledge and innovation economy The latest book in the International Studies in Higher Education series Universities and the Public Sphere addresses the vital role of research universities as global public spheres sites where public interaction conversation and deliberation take place where the nature of the State and private interests can be openly debated and contested At a time of increased privatization open markets and government involvement in higher education the book also addresses the challenges facing the university in its role as a global public sphere In this volume international contributors challenge prevalent views of the global marketplace to create a deeper understanding of higher education's role in knowledge creation and nation building In nearly every national context the pressures of globalization neo liberal economic restructuring and new managerial imperatives challenge traditional norms of autonomy academic freedom access and affordability The authors in Universities and the Public Sphere argue that universities are uniquely suited to have transformative democratic potential as global public spheres

Advanced Aircraft Design Egbert Torenbeek, 2013-05-28 Although the overall appearance of modern airliners has not changed a lot since the introduction of jetliners in the 1950s their safety efficiency and environmental friendliness have improved considerably Main contributors to this have been gas turbine engine technology advanced materials computational aerodynamics advanced structural analysis and on board systems Since aircraft design became a highly multidisciplinary activity the development of multidisciplinary optimization MDO has become a popular new discipline Despite this the application of MDO during the conceptual design phase is not yet widespread Advanced Aircraft Design Conceptual Design Analysis and Optimization of Subsonic Civil Airplanes presents a quasi analytical optimization approach based on a concise set of sizing equations Objectives are aerodynamic efficiency mission fuel empty weight and maximum takeoff weight Independent design variables studied include design cruise altitude wing area and span and thrust or power loading Principal features of integrated concepts such as the blended wing and body and highly non planar wings are also covered The quasi analytical approach enables designers to compare the results of high fidelity MDO optimization with lower fidelity methods which need far less computational effort Another advantage to this approach is that it can provide answers to what if questions rapidly and with little computational cost Key features Presents a new fundamental vision on conceptual airplane design optimization Provides an overview of advanced technologies for propulsion and reducing aerodynamic drag Offers insight into the derivation of design sensitivity information Emphasizes design based on first principles Considers pros and cons of innovative configurations Reconsiders optimum cruise performance at transonic Mach numbers Advanced Aircraft Design Conceptual Design Analysis and Optimization of Subsonic Civil Airplanes advances understanding of the initial optimization of civil airplanes and is a must have reference for
