Quality aspects in institutional translation Tomáš Svoboda, Łucja Biel, Krzysztof Łoboda, 2017
The purpose of this volume is to explore key issues, approaches, and challenges to quality in institutional translation by confronting academics and practitioners' perspectives. What the reader will find in this book is an interplay of two approaches: academic contributions providing the conceptual and theoretical background for discussing quality on the one hand, and chapters exploring selected aspects of quality and case studies from both academics and practitioners on the other. Our aim is to present these two approaches as a breeding ground for testing one vis-à-vis the other. This book studies institutional translation mostly through the lens of the European Union (EU) reality and more specifically of EU institutions and bodies due to the unprecedented scale of their multilingual operations and the legal and political importance of translation. Thus, it is concerned with the supranational/international level, deliberately leaving national and other contexts aside. Quality in supranational institutions is explored both in terms of translation processes and their products: the translated texts.
