**Can you design a package that keeps an egg from breaking when it is dropped from 10 feet in the air?**

Although it's important not to use too much packaging, some packaging is necessary. If certain kinds of products are not packaged, they will go bad or break while being transported. The trick is to use packaging that is strong but sustainable – packaging that won't harm the environment – and to use as little packaging as possible to get the job done. Your job is to make a sustainable package that is strong enough to keep your egg in one piece while using as little packaging as possible.

### Wrap Rap:

At the Ontario Science Center, scientists were able to stand a 200-pound person on an egg without breaking the egg. How did they do it? The domed shape of the egg makes the arch on top incredibly strong. The dome pushes out the weight so that the weight is spread out evenly down all sides of the egg and into the floor below. When you spread out the weight evenly, it's much easier to hold up.
