, *Learning by Effective Utilization of Technologies: Facilitating Intercultural Understanding* R. Mizoguchi, P. Dillenbourg, Z. Zhu, 2006-11-15 A major theme of this book is the use of computers for supporting collaborative learning This is not surprising since computer supported collaborative learning has become both a widespread educational practice and a main domain of research Moreover collaborative learning has deep roots in Asian educational traditions Given the large number of researchers within this field its scope has become very broad Under this umbrella one finds a variety of more specific topics such as interaction analysis collaboration scripts e.g. the

Jigsaw script communities of practice sociocognitive conflict resolution cognitive apprenticeship various tools for argumentation online discussion or collaborative drawing tools whiteboards collaborative writing and the role of facilitators Most research work on collaborative learning focuses on interactions rather than on the contents of environments which had been the focus in the previous decades of learning technology research However there is no reason to focus on one aspect to the detriment of the other The editors are pleased that the selected papers also cover multiple issues related to the storage representation and retrieval of knowledge ontologies for learning environments and the semantic web knowledge bases and data mining meta data and content management systems and so forth This publication also reveals a growing interest for non verbal educational material namely pictures and video materials which are already central to new popular web based applications This book includes contributions that bridge both research tracks the one focusing on interactions and the other on contents the pedagogical use of digital portfolios both for promoting individual reflections and for scaffolding group interactions

**Long-term effects of Learning English** Shigeo Uematsu,2015-05-05 This book presents a pioneering longitudinal study on English language instruction at the elementary school ELES level in the Japanese public school system It attempts to identify those domains most sensitive to early English instruction by employing a state of the art quantitative research methodology English education was formally introduced in Japan for fifth and sixth graders in 2011 and is still in its infancy as a program This study compares two groups Grade 7 and 8 of students one with ELES and one without in order to shed light on their experiences Comparisons are carried out not only quantitatively measuring changes in English skills listening speaking reading and vocabulary grammar and the ELES students affective aspects but also qualitatively through in depth interviews Thus this study attempts to capture the ELES students experiences from a multi dimensional perspective The

comprehensive literature review provided offers a valuable resource not only for researchers looking for a quick digest of the literature in this field before undertaking their own research but also for policy makers seeking to assess how to best implement ELES     Improving How Universities Teach Science Carl Wieman,2017-05-22 Too many universities remain wedded to outmoded ways of teaching Too few departments ask whether what happens in their lecture halls is effective at helping students to learn and how they can encourage their faculty to teach better But real change is possible and Carl Wieman shows us how it can be done through detailed tested strategies     **Sociological Abstracts** Leo P.
