

REACTION PAPER SAMPLE

In Ralph Rigman's book *The Whisper of Names*, he writes about his experiences growing up in the rural south of the country and how he envisions it possible to recreate the past wealth. His key points in this narrative and political story were that policy changes have resulted in the decline of southern wealth, and that continued machination would result in the downfall of the human race. He argues that by implementing more protectionist policies, agricultural and industrial jobs would return to the country and enable the rebuilding of poverty-stricken communities. Despite his arguments that policy changes have contributed most to the decline of the south, I believe that his lack of recognition of contribution of social factors makes this book highly unbelievable.

In *The Whisper of Names*, Rigman suggests that policy changes favoring imported goods have devastated the economy of the south. However, he fails to mention that much of the wealth of the south had been held in land-owning prosperous families who had benefited from the slave trade and subsequent cotton and tobacco industries. Throughout the early 20th century, these families continued to prosper under sharecropping laws. The civil rights movement finally brought to light the injustices of racial inequality as well as the violation of human rights that resulted in cheap labor that drove the southern economy. Of course, Mr. Rigman does not mention any of these factors in his book.

By focusing only on legal changes that support his argument, Mr. Rigman ends up weakening his overall statement. To be sure, the increase in imported goods increases competition and forces businesses to lower prices and/or increase innovation to gain customers. However, this is not necessarily a bad thing, and machination has increased worker safety and product consistency. *The Whisper of Names* is a powerful narrative of one man's observations of the dwindling wealth of the south, but it may not be a result of the movements that he cites.
