Progress in Landslide Research and Technology, Volume 1 Issue 2, 2022 Irasema Alcántara-Ayala, Željko Arbanas, David Huntley, Kazuo Konagai, Matjaž Mikoš, Kyoji Sassa, Shinji Sassa, Huiming Tang, Binod Tiwari, 2023-01-10 This open access book provides an overview of the progress in landslide research and technology and is part of a book series of the International Consortium on Landslides ICL It gives an overview of recent progress in landslide research and technology for practical applications and the benefit for the society contributing to understanding and reducing landslide disaster risk

Eurosoil 2021: Sustainable management of soil functions as a basis to avoid, halt, and reverse land degradation Jörg Luster, Thomas Keller, Miriam Muñoz-Rojas, Lucy Crockford, Ute Wollschläger, 2023-03-13 **Handbook of Environmental Engineering** Myer Kutz, 2018-10-16 A comprehensive guide for both fundamentals and real world applications of environmental engineering Written by noted experts Handbook of Environmental Engineering offers a comprehensive guide to environmental engineers who desire to contribute to mitigating problems such as flooding caused by extreme weather events protecting populations in coastal areas threatened by rising sea levels reducing illnesses caused by polluted air soil and water from improperly regulated industrial and transportation activities promoting the safety of the food supply Contributors not only cover such timely environmental topics related to soils water and air minimizing pollution created by industrial plants and processes and managing wastewater hazardous solid and other industrial wastes but also treat such vital topics as porous pavement design aerosol measurements noise pollution control and industrial waste auditing This important handbook Enables environmental engineers to treat problems in systematic ways Discusses climate issues in ways useful for environmental engineers Covers up to date measurement techniques important in environmental engineering Reviews current developments in environmental law for environmental engineers Includes information on water quality and wastewater engineering Informs environmental engineers about methods of dealing with industrial and municipal waste including hazardous waste Designed for use by practitioners students and researchers Handbook of Environmental Engineering contains the most recent information to enable a clear understanding of major environmental issues **Active Anti-Roll Bar Control Design for Heavy Vehicles** Vu Van Tan, Olivier Senname, Peter Gaspar, Trong Tu Do, 2024-04-02 This book provides a comprehensive overview of active anti roll bar systems on heavy vehicles as one of the most effective solutions for improving the roll stability of these vehicles Due to the characteristics of these vehicles with heavy loads and high center of gravity the possibility of roll instability occurs frequently and causes serious consequences for human life vehicles and traffic infrastructure The book gives readers an in depth survey of the roll instability characteristics of heavy vehicles such as single unit trucks with rigid and flexible frames and tractor semi trailers It then introduces an active anti roll bar system the electro hydraulic actuators which use control methods such as LQR optimal and H robust controller design This work introduces a new control method which is a combination of robust control with the linear parameter varying

system H LPV The validation of the new hybrid method is carried out using the nonlinear truck model from the TruckSim software to assess the roll stability of heavy vehicles in order to limit the rollover accident A number of examples are provided to illustrate the research results which helps the readers have a practical and easy approach that can be applied to other active anti roll bar systems for most forms of transport vehicles in general This book caters to academics and practitioners who are interested in active anti roll bar systems for the typical heavy vehicle available worldwide

Advances in Analysis and Design of Deep Foundations Murad Abu-Farsakh, Khalid Alshibli, Anand Puppala, 2017-07-11 This volume on Advances in Analysis and Design of Deep Foundations contains 22 technical papers which cover various aspects of analysis and design of deep foundations based on full scale field testing numerical modeling and analytical solutions The technical papers are 8 10 pages long that present the results and findings from research as well as practical oriented studies on deep foundations that are of interest to civil geotechnical engineering community The topics cover a wide spectrum of applications that include evaluation of the axial and lateral capacity of piles pile group effects evaluation of the increase in pile capacity with time or pile setup influence of excavation on pile capacity study the behavior of pile raft caisson foundations evaluate the bearing capacity and settlement of piles from cone penetration tests etc This volume is part of the proceedings of the 1st GeoMEast International Congress and Exhibition on Sustainable Civil Infrastructures Egypt 2017

Adaptive Nutrient Management Systems for Plant Nutrition: Optimization, Profitability, and Ecosystem Assessment Henry Yabbey Sintim, Khurram Shahzad, Xinhua Yin Yin, 2025-03-25 Proper nutrient management is essential for optimizing plant growth and productivity while minimizing environmental impact Traditional nutrient management practices often rely on fixed application rates as determined from soil test analyses and other non plant based factors without considering the dynamic nutrient requirements of plants Adaptive nutrient management systems aim to address this issue by integrating precision agriculture data driven approaches and advanced technologies to optimize nutrient application strategies These systems take into account factors such as in season soil and crop conditions as well as other environmental variables to tailor nutrient inputs for increased plant productivity reduced nutrient losses and maximum economic profitability

S. Krishnan, 2017-08-03 This book draws upon nearly seven decades of first hand experiences from the ground to understand social exclusion and movements and efforts for social justice in India The author

a renowned champion of social justice for deprived social classes delves into the roots of discrimination in Indian society as well as explains why caste discrimination still persists and how it can be effectively countered The volume examines the caste system and its socio economic ramifications from the perspective of Dalits and Socially and Educationally Backward Classes explores the nuances of the Gandhi Ambedkar debate on the status and liberation of Dalits and synthesis of the approaches of Gandhi Ambedkar Narayana Guru and Marx in resolving certain key issues analyses legal economic social and cultural frameworks to understand caste system and related concepts such as untouchability atrocities reservation etc in contemporary India and provides practical insights into the Constitution based comprehensive measures required to remedy the consequences of caste system and establish social equality in a holistic manner The book will interest scholars and researchers of social exclusion and social justice Dalit Adivasi and Backward Classes studies sociology and social anthropology politics law and human rights as well as policy makers think tanks and NGOs in the field Environmental, Social, and Corporate Governance and Sustainability Taewoo Roh, Minwoo Lee, Byung Il Park, 2022-11-28 *Education Systems Around the World* Gilson Porto, 2020-04-08 This book *Education Systems Around the World* is a collection of reviewed and relevant research chapters that offer a comprehensive overview of recent developments in the field of social sciences and humanities The book comprises single chapters authored by various researchers and edited by an expert active in the field of social studies and humanities All chapters are unique but are united under a common research study topic This publication aims to provide a thorough overview of the latest research efforts by international authors on social studies and humanities and open new possible research paths for further novel developments Slope Safety Preparedness for Impact of Climate Change Ken Ho, Suzanne Lacasse, Luciano Picarelli, 2017-06-01 Many countries are increasingly threatened by major landslide disasters and fatalities due to extreme weather events which have major implications for public safety and the sustainability of infrastructure and the built environment A further increase in such a trend could come from climate change This book helps to fill in the gap due to the fact that landslide hazards are commonly not covered under the policy debate on climate change The book highlights the importance of raising awareness to the challenges of landslide hazards due to climate impact It provides a holistic frame for understanding the key issues and new tools that could be used to assess and manage the landslide risks The book gathers contributions from 21 countries and regions in the form of national reports or summaries with respect to four key aspects a the methods used for evaluating changing weather and changing landslide patterns b the changing weather patterns c the changing landslide patterns and hazard scenarios d the applications to risk management and the formulation of adaptation measures Recommendations are made for enhanced preparedness and resilience Improved crisis management and areas for future work are suggested Laboratory Tests for Unsaturated Soils Eng-Choon Leong, Martin Wijaya, 2023-02-16 The testing of unsaturated soils requires greater care and effort than that of saturated soils Although unsaturated soil mechanics has been embraced by geotechnical engineering engineering practice

has not yet caught up as the characterization of unsaturated soils is difficult and time consuming and made harder still by a lack of standards Laboratory Tests for Unsaturated Soils collates test procedures to cover all laboratory tests for characterising unsaturated soils It covers the background theory test procedures and interpretation of test results Each test procedure is broken down into simple stages and described in detail The pitfalls of each test and the interpretation of the test results are explained Test data and calculation methods are given along with many numerical examples to illustrate the methods of interpretation and to offer the presentation of typical results The book is especially useful for students and researchers who are new to the field and provides a practical handbook for engineering applications

Whispering the Techniques of Language: An Psychological Journey through **Final Time Table For Caps Matric 2014**
