## CHAPTER 2 – REVIEWING FINANCIAL STATEMENTS

### Questions

- LG1 1. List and describe the four major financial statements.

The four basic financial statements are:

1. The **balance sheet** reports a firm's assets, liabilities, and equity at a particular point in time.
2. The **income statement** shows the total revenues that a firm earns and the total expenses the firm incurs to generate those revenues over a specific period of time—generally one year.
3. The **statement of cash flows** shows the firm's cash flows over a given period of time. This statement reports the amounts of cash the firm generated and distributed during a particular time period. The bottom line on the statement of cash flows—the difference between cash sources and uses—equals the change in cash and marketable securities on the firm's balance sheet from the previous year's balance.
4. The **statement of retained earnings** provides additional details about changes in retained earnings during a reporting period. This financial statement reconciles net income earned during a given period minus any cash dividends paid within that period to the change in retained earnings between the beginning and ending of the period.

- LG1 2. On which of the four major financial statements (balance sheet, income statement, statement of cash flows, or statement of retained earnings) would you find the following items?
- a. earnings before taxes - income statement
  - b. net plant and equipment - balance sheet
  - c. increase in fixed assets - statement of cash flows
  - d. gross profits - income statement
  - e. balance of retained earnings, December 31, 20xx - statement of retained earnings and balance sheet
  - f. common stock and paid-in surplus - balance sheet
  - g. net cash flow from investing activities - statement of cash flows
  - h. accrued wages and taxes - balance sheet
  - i. increase in inventory - statement of cash flows

- LG1 3. What is the difference between current liabilities and long-term debt?

Current liabilities constitute the firm's obligations due within one year, including accrued wages and taxes, accounts payable, and notes payable. Long-term debt includes long-term loans and bonds with
