**Research, Practice, and Innovations in Teacher Education During a Virtual Age** Zimmerman, Aaron Samuel, 2022-11-18 Decades of research have shown that early career teachers face a number of challenges and hold an increasingly wide set of responsibilities Teacher educators therefore must think carefully about how to prepare early career teachers for the profession Additionally however the work of teaching and teacher education has become increasingly complex within the context of the current virtual age including the prominent reality of social media and the significant possibilities of online teaching and learning *Research Practice and Innovations in Teacher Education During a Virtual Age* makes a significant contribution to the scholarship on teacher education by presenting a variety of evidence based methods that can be used to develop and improve aspects of teacher education within this virtual age including the curriculum and pedagogy of online teacher education as well as effective ways to prepare preservice teachers for the realities of online teaching and online learning Covering topics such as virtual caring learning material adaptation and instructional coaching this premier reference source is a dynamic resource for teacher educators pre service teachers administrators and educators of both K 12 and higher education government officials policymakers researchers and academicians

**Guided by Meaning**

**in Primary Literacy** Joyce Armstrong Carroll, Kelley Barger, Karla James, Kristy Hill, 2016-12-12 Using a research based approach this book examines the critical connections between writing and reading and it explains how to encourage early literacy in the classroom and library How can teachers and librarians support true literacy in young learners Are very young children guided by meaning in constructing their reality and their relationship to the world What is the value of championing writing at the kindergarten level Guided by Meaning in Primary Literacy Libraries Reading Writing and Learning answers these questions and many more providing best practices in early literacy through explicit lessons in writing and reading and demonstrating how the library can extend learning in deep and powerful ways While some books emphasize reading others emphasize writing and still others focus on library instruction this profound resource brings all of the components of literacy together in a meaningful way Throughout the book the authors highlight examples of student writing anecdotes from the real world and connections between theory and what happens in practical application Unique in its thoroughness of content for this age group this text is essential reading for all early childhood teachers and librarians working in schools and in public libraries with young children The book also serves trainers working with teachers and librarians to increase their effectiveness in working with young children to promote early literacy

**Feminist Posthumanisms, New Materialisms and Education** Jessica Ringrose, Katie Warfield, Shiva Zarabadi, 2020-04-28 This edited collection is a careful assemblage of papers that have contributed to the maturing field within education studies that works with the feminist implications of the theories and methodologies of posthumanism and new materialism what we have also called elsewhere PhEmaterialism The generative questions for this collection are what if we locate education in doing and becoming rather than being And how does associating education with matter multiplicity and relationality change how we think about agency ontology and epistemology This collection foregrounds cutting edge educational research that works to trouble the binaries between theory and methodology It demonstrates new forms of feminist ethics and response ability in research practices and offers some coherence to this new area of research This volume will provide a vital reference text for educational researchers and scholars interested in this burgeoning area of theoretically informed methodology and methodologically informed theory The chapters in this book were originally published as articles in Taylor Francis journals

*Guided Math Lessons in Second Grade* Nicki Newton, 2021-07-15 Guided Math Lessons in Second Grade provides detailed lessons to help you bring guided math groups to life Based on the bestselling Guided Math in Action this practical book offers 16 lessons taught in a round of 3 concrete pictorial and abstract The lessons are based on the priority standards and cover fluency word problems operations and algebraic thinking and place value Author Dr Nicki Newton shows you the content as well as the practices and processes that should be worked on in the lessons so that students not only learn the content but also how to solve problems reason communicate their thinking model use tools use precise language and see structure and patterns Throughout the book you ll find tools templates and blackline masters so that you can instantly adapt the lesson to your specific needs and use it right

away With the easy to follow plans in this book students can work more effectively in small guided math groups and have loads of fun along the way

**Guided Math Lessons in Fourth Grade** Nicki Newton, 2021-11-29 Guided Math Lessons in Fourth Grade provides detailed lessons to help you bring guided math groups to life Based on the bestselling Guided Math in Action this practical book offers 16 lessons taught in a round of three concrete pictorial and abstract The lessons are based on the priority standards and cover fluency word problems fractions and place value Author Dr Nicki Newton shows you the content as well as the practices and processes that should be worked on in the lessons so that students not only learn the content but also how to solve problems reason communicate their thinking model use tools use precise language and see structure and patterns Throughout the book you ll find tools templates and blackline masters so that you can instantly adapt the lesson to your specific needs and use it right away With the easy to follow plans in this book students can more work effectively in small guided math groups and have loads of fun along the way Remember that guided math groups are about doing the math So doing mathematical sketches to show what they understand and can make sense of the abstract numbers When students are given the opportunities to make sense of the math in hands on and visual ways then the math begins to make sense
