Schools of Opportunity Adam York, Kevin Welner, Linda Molner Kelley, 2023. *Schools of Opportunity* builds an argument for shifting the way that excellent schools are recognized and built. The National Education Policy Center's *Schools of Opportunity* project was designed to highlight public high schools that are using research-based practices for closing opportunity gaps in student learning. The project recognizes schools working to address the needs of all students whether or not those schools have high average test scores. This approach thus embraces a shift away from the nation's myopic focus on outcomes. This follows from research findings that schools alone cannot fix the problems created by the stark inequalities in our society. Instead schools should be expected to do their part by responding to inequities with research-based practices. With these shifts in mind this book provides case studies of schools that demonstrate key criteria that other schools can emulate such as an inclusive school climate support for language minority students performance based assessment teacher professionalism a commitment to detracking and supports for students in need. **Book Features** Provides accounts of school reform jointly told by researcher/practitioner teams connecting current research with successful efforts of educators to create outstanding learning environments. Brings together the voices of principals and school leaders who share stories of how their work has unfolded in their school district and state contexts. Identifies the school leadership and teacher practices that close opportunity gaps for student learning and what it takes to implement them. *Strengthening America's Competitiveness Through Common Academic Standards* United States. Congress. House. Committee on Education and Labor, 2009. *Ready to Test, Grade 3* American Education Publishing, 2012-01-03. These 256 page workbooks help students improve test scores by preparing them for standardized tests. *Quick Reference for Counselors*, 2011. *Rising Above the Gathering Storm* Institute of Medicine, National Academy of Engineering, National Academy of Sciences, Committee on Science, Engineering, and Public Policy, Committee on Prospering in the Global Economy of the 21st Century: An Agenda for American Science and Technology, 2007-03-08. In a world where advanced knowledge is widespread and low cost labor is readily available U.S. advantages in the marketplace and in science and technology have begun to erode. A comprehensive and coordinated federal effort is urgently needed to bolster U.S. competitiveness and pre-eminence in these areas. This congressionally requested report by a pre-eminent committee makes four recommendations along with 20 implementation actions that federal policy makers should take to create high quality jobs and focus new science and technology efforts on

meeting the nation's needs especially in the area of clean affordable energy 1 Increase America's talent pool by vastly improving K 12 mathematics and science education 2 Sustain and strengthen the nation's commitment to long term basic research 3 Develop recruit and retain top students scientists and engineers from both the U S and abroad and 4 Ensure that the United States is the premier place in the world for innovation Some actions will involve changing existing laws while others will require financial support that would come from reallocating existing budgets or increasing them Rising Above the Gathering Storm will be of great interest to federal and state government agencies educators and schools public decision makers research sponsors regulatory analysts and scholars
