ExamREVIEW,2012-09-24 The Certified Professional Forecaster CPF certification is essential for professionals involved in the areas of supply side business forecasting Candidates must pass 3 exams in order to earn the CPF designation The major topics covered by the 3 exams include Module 1 ROLE OF FORECASTING IN BUSINESS THE FORECASTING PROCESS COLLABORATIVE PROCESS TYPES OF MODELS TIME SERIES MODELS FORECAST ACCURACY BASIC KNOWLEDGE OF MS EXCEL Module 2 DATA SOURCES DATA ANALYSIS TREATMENT TIME SERIES MODELS Module 3 FORECAST REPORTING COMMUNICATION SKILLS As stated by IBF the candidate should have prior knowledge and experience in the field of forecasting in order to pass the exams There are 3 exams required and there is no single book available that can cover everything tested You want to do as much reading as possible and you want to have focused review on the key topics that can make a life and dead difference The CPF exams have a lot of questions that ask for your best decisions i e how you will tackle a situation in a live environment In fact of the questions you will encounter in the exams a significant portion of them requires that you pick the best possible options These best options are often based on experience and best practices not easily found in the standard exam text books ExamFOCUS Study Notes build a solid focus while revisiting key examination topics Whether you are just starting to study cramming at the last minute or simply looking to refresh this could prove to be a lifesaver To succeed in the exam you need to get yourself truly familiar with the most important information by going through sufficiently focused revision This is where we fill the gap you may think of our product as the unofficial supplement to the regular training class or you may view it as a standalone module with a focus on building up your exam readiness As an effective learning aid implemented in the format of study notes the ExamFOCUS CPF Study Notes package is designed to present information in an easy to understand conversational format Notes are well written technically accurate and completely representative of the key information covered by the exam

Treatment Fundamentals of Models Modeling Types of Models Time Series Models Model Selection Metrics Measuring Forecast Error and Performance Exam 3 Forecast Reporting Presentation Forecast Communication Winning Support and Confidence of Management Getting Buy in from Stakeholders Instead of following the official topic flow this book is structured into parts The first part deals with knowledge on supply chain The other parts deal with all sorts of business forecasting techniques and methods Think of part 1 as the foundation knowledge you need to prepare for the exams The 3 exams have topics that are inter related We therefore like to recommend that you study all of them together instead of studying on a per exam basis Get yourself fully prepared on ALL topics prior to sitting any single exam Do not attempt to take the exams unless you have hands on skills making forecasts This study notes provide study material for exam preparation However this is not intended to be used as a tutorial on statistics or forecasting techniques You should go through sufficient hands on exercises before using this study notes A competent test taker will always use multiple resources for preparation There are other readings you will find helpful in learning the subjects Topics not listed in the official subject list may still show up in the exams for purpose of distraction Therefore do as many readings as possible **CFP Exam Calculation**
