Using Data Envelopment Analysis highlights the advantages of using DEA as a tool to improve business performance and identify sources of inefficiency in public and private organizations. These recently developed theories and applications of DEA will be useful for policymakers, managers and practitioners in the areas of sustainable development of our society including environment, agriculture, finance and higher education sectors. *Handbook of Research on Engineering, Business, and Healthcare Applications of Data Science and Analytics* Patil, Bhushan, Vohra, Manisha, 2020-10-23. Analyzing data sets has continued to be an invaluable application for numerous industries. By combining different algorithms, technologies and systems used to extract information from data and solve complex problems, various sectors have reached new heights and have changed our world for the better. The *Handbook of Research on Engineering, Business and Healthcare Applications of Data Science and Analytics* is a collection of innovative research on the methods and applications of data analytics. While highlighting topics including artificial intelligence, data security and information systems, this book is ideally designed for researchers, data analysts, data scientists, healthcare administrators, executives, managers, engineers, IT consultants, academicians and students interested in the potential of data application technologies. *Bridging the Socio-technical Gap in Decision Support Systems* Frédéric Adam, Carlos Teixeira, João Telhada, 2010-06-15. The socio-technical gap is the great divide between social activities such as coordination which researchers and practitioners aim to support and those that are actually supported by technology. As the social interaction takes place through technology, it is changed and mediated by the technology. This gap between the two dimensions is being challenged by new and innovative approaches such as cognitive ergonomics and Web 2.0. *Research in Decision Making: DM theory and Decision Support Systems* DSS shows that this gap is due in part to technical limitations and in part to the complexity of the contexts where decision support must be provided. Thus DSS researchers face important questions concerned with the encapsulation of complex social aspects of managerial decision making as well as with the representation of key human cognitive mechanisms such as intuition and insight within computational systems. This book presents the latest innovations and advances in decision support theory and practice with a special focus on bridging the socio-technical gap. These achievements will be of interest to all those involved in decision making activities and research. The book covers a wide range of topics including Understanding DM, Design of DSS, Web 2.0 Systems in Decision Support, Business Intelligence and Data Warehousing, Applications of Multi Criteria Decision Analysis, Intelligent DM, Context in DM, Knowledge Management, ERP Systems, Decision Support for Policy Making, Decision Making in Emergency Scenarios, Decision Support in Commerce and Decision Support for Production Planning. *Bridging the Socio-technical Gap in Decision Support Systems* Ana Respício, 2010.
