Implementing IBM Storage Data Deduplication Solutions Alex Osuna,Eva Balogh,Alexandre Ramos Galante de Carvalho,Rucel F. Javier,Zohar Mann,IBM Redbooks,2011-03-24 Until now the only way to capture store and effectively retain constantly growing amounts of enterprise data was to add more disk space to the storage infrastructure an approach that can quickly become cost prohibitive as information volumes continue to grow and capital budgets for infrastructure do not In this IBM Redbooks publication we introduce data deduplication which has emerged as a key technology in dramatically reducing the amount of and therefore the cost associated with storing large amounts of data Deduplication is the art of intelligently reducing storage needs through the elimination of redundant data so that only one instance of a data set is actually stored Deduplication reduces data an order of magnitude better than common data compression techniques IBM has the broadest portfolio of deduplication solutions in the industry giving us the freedom to solve customer issues with the most effective technology Whether it is source or target inline or post hardware or software disk or tape IBM has a solution with the technology that best solves the problem This IBM Redbooks publication covers the current deduplication solutions that IBM has to offer IBM ProtecTIER Gateway and Appliance IBM Tivoli Storage Manager IBM System Storage N series Deduplication Programmed Learning and Individually Paced Instruction Carl H.
