10/14/15

- 1) Name the factors responsible for the shift in physicians' attitudes over the last 30 years toward truth-telling with cancer patients. Discuss the use of placebos in medicine.  
Treatment for cancer improved (cancer no longer means death)  
increased public awareness of cancer → less stigmatization  
Better understanding of the process of death and dying → more effective communications with dying  
more informed/more needed to know to participate in research/treatment  
Impact of medical literature encouraging frankness  
More sweeping social changes  
Increased belief in patient's "right to know"  
  
Placebos  
Strong moral obligation to honesty and truthfulness  
Danger to patient-physician relationship  
Can be used:  
If there is a high response rate to placebos  
Only alternative is continued illness or known toxic drug  
Patient wants to be treated and cured  
Patient insists on prescription
- 2) What are the basic goals of medicine?  
protecting health, preventing disease, preventing untimely death, relieving symptoms, curing disease, improving functional status, educating/counseling patients, avoiding harm
- 3) What are the arguments for claiming that there is a difference between active killing and allowing to die and what is the argument for claiming that there is no difference between them?  
Difference:  
Beneficence → consequences of the practice permitting active killings would be worse than consequences of permitting foregoing treatment  
Duty to avoid killing → there is simply something inherently wrong about killing someone  
Autonomy/informed consent → letting die at the request of patient or surrogate is always prima facie right because it is required to respect autonomy while respect for patient autonomy never calls for killing another  
No difference:  
Consequentialists → no difference because results are the same
- 4) What are the main differences between principlism and casuistry? What are the guiding "principles of biomedical ethics"? Are there limits to patient autonomy? Beneficence? Define paternalism; is there a place for paternalism in modern medicine?
- 5) What are the primary components of the Hippocratic Oath? What is its core principle?  
Oath of initiation: vow of allegiance to physician's teacher, pledge to loyalty and secrecy  
Code: dietetics, pharmacology, surgery  
Core principle: the physician should benefit the patient according to the ability and judgment
