On Legislatures Gerhard Loewenberg,2015-11-17 *On Legislatures* looks at why people support their individual representatives but continue to criticise the legislative system at every opportunity Although legislatures exist in every political system and are meant to represent the people they are generally disparaged because they appear both unrepresentative and indecisive Gerhard Loewenberg explains this puzzling contradiction by examining what representation means and what it takes for a large number of equally representative members to reach decisions It also describes the methods for studying legislatures that have been developed in the social sciences in the last half century and shows their importance in democratic societies throughout the world *On Legislatures* gets to the heart of the current disconnect between legislatures and the public they are supposed to represent **National Union Catalog** ,1979 Includes entries for maps and atlases *The National union catalog, 1968-1972* ,1973 **The National Union Catalog, Pre-1956 Imprints** Library of Congress,American Library Association.
