3. If "Set Humidity" level is lower than the "Room" humidity level, the compressor will start up and unit will start dehumidification.
   If "Set Humidity" level is higher than the "Room" level, the unit will continue to run on low fan.
4. After operating several days at the default setting, with doors and windows closed, you may adjust the "Set Humidity" to a slightly lower percent (drier air) or higher percent (moist air). If you would like to adjust the "Set Humidity" humidity level, press the "+" or "-" to adjust the humidistat in 5% increments between 30% and 90%.
5. The "Room" display will display either the relative humidity or temperature of the room. The default setting is room humidity. To display the temperature of the room press the "Humidity/Temp" button. Press it again to go back to the humidity level.
   To display the Temperature in Centigrade: hold down the "Humidity /Temp" button for 5 seconds.

To empty the Container:

When the condensate water container is full, the indicator lights up.

1. Turn the power off before removing container. Wait 3 minutes for any remaining water to drain into the condensate container.

4. For cleaning the water container, and wash with warm soapy water.

Proper use and care of your dehumidifier will help ensure longer life of the unit. It is recommended to annually inspect and clean the coils and condensate water passages. Expense of annual inspection is the consumers' responsibility.

6. Press the "Fan Speed" button if you would like to change the fan speed from "Low" to "High". Use the high speed to maintain maximum water removal. The lower speed can be used when quieter operation is desired.
7. Press "Pause" button to pause operation of dehumidifier for 1 hour.
8. An automatic overflow switch and Container "Full" indicator light are provided to turn the dehumidifier off before the container overflows. When the indicator light on the control panel glows, the water container must be emptied.
9. If Set humidity is set to 30% then unit is in "continuous run" mode. While in this mode the compressor will continuously run regardless of actual room Humidity. If not properly monitored this setting could cause excess energy usage.

Note: A piece of tape is attached to the container to ensure safe shipping. This piece of tape can be removed.
