Jason J. Dickinson,Nadja Schreiber Compo,Rolando Carol,Bennett L. Schwartz,Michelle McCauley,2019-02-21 For as long as we have been researching human memory psychologists have been investigating how people remember and forget This research is regularly drawn upon in our legal systems Historically we have relied upon eyewitness memory to help judge responsibility and adjudicate truth but memory is malleable prone to error and susceptible to bias Even confident eyewitnesses make mistakes and even accurate witnesses sometimes find their testimony subjected to harsh scrutiny Emerging from this environment the Cognitive Interview CI became a means of assisting cooperative witnesses with recalling more information without sacrificing accuracy First used by police interviewing adult witnesses it is now used with many populations in many contexts including public health accident reconstruction and the interrogation of terror suspects Evidence Based Investigative Interviewing reviews the application of cognitive research to investigative interviewing revealing how principles of cognition memory and social dynamics may increase the accuracy of eyewitness testimony It provides evidence based applications for investigators beyond the forensic domain in areas such as eyewitness identification detecting deception and interviewing children Drawing together the work of thirty three authors across both the academic and practice communities this comprehensive collection is essential reading for researchers in psychology forensics and disciplines such as epidemiology and gerontology **Judgment on the Front Line** Chris DeRose,Noel M. Tichy,2012-10-11

Front line employees who deal directly with customers are the face of any organization Not only do they have the most impact on how a brand is perceived but they are also the most valuable source of insight into what customers want and how to give it to them Unfortunately as management experts Chris DeRose and Noel M Tichy explain most organizations don't know how to evaluate the risk of giving employees more autonomy Many of those who are willing to try haven't even invested resources in ensuring that once the shackles are off front line employees make good judgments Tichy and DeRose offer

powerful examples of front line leadership such as How Zappos trusts its people to do anything in service of a customer including providing free product or reimbursing for mistakes How Mayo Clinic of Arizona enabled its nurses to challenge the hierarchy in order to improve patient care

Golden Holocaust Robert N. Proctor, 2012-02-28 The cigarette is the deadliest artifact in the history of human civilization It is also one of the most beguiling thanks to more than a century of manipulation at the hands of tobacco industry chemists In *Golden Holocaust* Robert N Proctor draws on reams of formerly secret industry documents to explore how the cigarette came to be the most widely used drug on the planet with six trillion sticks sold per year He paints a harrowing picture of tobacco manufacturers conspiring to block the recognition of tobacco cancer hazards even as they ensnare legions of scientists and politicians in a web of denial Proctor tells heretofore untold stories of fraud and subterfuge and he makes the strongest case to date for a simple yet ambitious remedy a ban on the manufacture and sale of cigarettes
