

CARESCAPE Monitor B650

The evolution of

Critical Care:

supporting efficient and informed decisions.

In the Critical Care Unit, efficiency is paramount. You can't afford to spend time piecing together incomplete information or tracking down vital patient data in multiple hard-to-reach systems. Your technology should support you by combining monitoring data streams with access to cardiac records and other relevant data to help you make the best care decisions.

The CARESCAPE™ Monitor B650 makes it fast and easy to access the vital patient details you need, right when and where you need them. At its foundation are GE's clinical algorithms, widely recognized for their leading cardiac and ventilation assessment capabilities. In addition, the CARESCAPE Monitor B650 collects data from multiple systems and delivers it in an intuitive, integrated display that results in fewer repetitive tasks, faster access and quicker analysis. As a result, caregivers are armed with the decision support information required to deliver appropriate, expedient patient care.

The CARESCAPE Monitor B650 combines the features and functionality you need to provide exceptional care:

Fast access to accurate clinical data

- *Vital patient details all in one place for a streamlined, efficient workflow*
- *Integrated connection to MUSE® ECG management system provides instant access to reports and expert cardiology diagnosis*
- *Clinically excellent algorithms deliver a wide range of measurements, based on heritage from Marquette Electronics and Datascope*
- *Wired or wireless network connectivity allows for alarm sharing, central station monitoring and data capture to electronic medical record systems*

Informed weaning assessments

- *Critical information, including spirometry with gas exchange, measured airway pressures, volumes, and calculated values at the patient's airway deliver reliable, vital measurements to help assess patient readiness for ventilator weaning*
- *SpO₂ and CO₂ parameters provide data for oxygenation and ventilation calculations*
- *Preconfigured monitor profiles and screen layouts allow you to assess data quickly when consulting or considering next steps*
- *Unity Network™ Interface Device, when combined with the CARESCAPE Monitor B650, allows for ventilator data integration*

Systems Analysis and Synthesis Barry Dwyer,2016-03-23 Systems Analysis and Synthesis Bridging Computer Science and Information Technology presents several new graph theoretical methods that relate system design to core computer science concepts and enable correct systems to be synthesized from specifications Based on material refined in the author's university courses the book has immediate applicability for working system engineers or recent graduates who understand computer technology but have the unfamiliar task of applying their knowledge to a real business problem Starting with a comparison of synthesis and analysis the book explains the fundamental building blocks of systems atoms and events and takes a graph theoretical approach to database design to encourage a well designed schema The author explains how database systems work useful both when working with a commercial database management system and when hand crafting data structures and how events control the way data flows through a system Later chapters deal with system dynamics and modelling rule based systems user psychology and project management to round out readers ability to understand and solve business problems Bridges computer science theory with practical business problems to lead readers from requirements to a working system without error or backtracking Explains use definition analysis to derive process graphs and avoid large scale

designs that don't quite work Demonstrates functional dependency graphs to allow databases to be designed without painful iteration Includes chapters on system dynamics and modeling rule based systems user psychology and project management
