Successful wide application of ion implantation as well as exploitation of newly identified opportunities will require the development of comprehensive implant models. The 141 papers including 24 invited papers in this volume address the most recent developments in this field. New structures and possible approaches are described. The implications for ion implantation technology as well as additional observations of needs and opportunities are discussed. The volume will be of value to all those who are interested in acquiring a more complete understanding of the current developments in ion implantation processes and comprehensive implant models. *JNCI, Journal of the National Cancer Institute* National Cancer Institute (U.S.), 1985
