Grade Agricultural Science December 2014 Paper 1:

Daily Graphic Ransford Tetteh, 2014-09-19 *Foreign Direct Investment in Agriculture* Jan Schüpbach, 2015-10-07

Foreign direct investment in agriculture and land has increased substantially since the 2007 2008 food price crisis. However, there is a severe lack of quantitative evidence on its economic impact. Therefore, the primary goal of this study was to collect and analyze empirical evidence in order to better understand the potential benefits and pitfalls of such investments and related processes of agricultural commercialization. In particular, the study tests the effect of two strategies for including smallholder farmers into modern food supply chains: 1. Outgrower schemes, i.e. a type of contract farming whereby small scale farmers produce crops for large scale farming enterprises; 2. Wage employment on large scale estates. The central part of the study looks at one specific investment project in the Zambian sugar cane sector. This sectoral focus was supplemented by a broader cross sectoral analysis of a large nationally representative panel survey. Overall, the evidence suggests that large scale investments by foreign as well as domestic companies, and especially the model of cooperation with smallholder farmers in outgrower schemes, can indeed have positive and significant effects on the income and wealth of rural households.

Contract Farming and the Development of Smallholder Agricultural Businesses Joseph A. Kuzilwa, Niels

Fold, Arne Henningsen, Marianne Nylandsted Larsen, 2017-08-24. Contract farming has received renewed attention recently as developing economies try to grapple with how to transform the agricultural sector and its associated value chains. This book examines different contract arrangements for selected crops, applying both qualitative and quantitative approaches in order to examine how contract farming affects smallholders and value chain dynamics in Tanzania. Major themes covered in the book include contract farming policy, contract farming and value chain dynamics, contract farming adoption decisions, contract farming and income diversification. The authors also discuss alternative aspects of contract farming such as trust, conspiracy, empowerment, and corporate social responsibility. The book presents original research from case studies conducted in Tanzania on sugarcane, tobacco, sunflower, and cotton. These crops have a history of trials and errors with contract farming involving smallholders. Furthermore, they are targeted in national strategies as some of the main crops for establishment and upgrading of agro-industrial activities in Tanzania.
