Grade Economics 3rd Term Paper:

The Downsizing of Economics Professors Steven Payson, 2017-10-24 The number of economics professors now teaching at universities will decline substantially over the next couple of decades This will happen for one main reason the advent of distance learning especially in the form of Massive Open Online Courses MOOCs which enable a single professor to lecture to tens of thousands of students Other academic fields will undoubtedly encounter similar reductions in their numbers of professors However as this book argues at several levels academic economics is the one profession that is most qualified to study and address the topic In this sense it is the one profession that should best recognize the economic benefits of this transition which this book describes and take responsibility for leading the transition among all academic fields Unfortunately the position espoused by several academic economists has been against this inevitable transition a position that politically upholds their employment and the status of their institutions They have asserted that MOOCs lower the quality of education and threaten the financial viability of traditional universities Based on extensive evidence and analysis however this book argues that their position untenable Their position is hypocritical as well given the fact that economics professors more than anyone else have upheld the idea that jobs should be lost and new ones should be gained in response to technological changes that promote economic efficiency There is also irony in the fact that the high tuitions required to maintain traditional classrooms effectively deny a college education to those who cannot afford it Thus unsound arguments that traditional lectures are needed to preserve the quality of education actually do not improve the quality of education but have the only real effect of denying education to many people who would otherwise be able to receive it To address this topic comprehensively the book goes deep into fundamental questions about what economics professors really do with their time and energy and what they should be doing in the best interests of their students and of society These are areas that the profession has needed to address for a long time but has failed to do so *Handbook of Research in Education Finance and Policy* Helen F. Ladd, Margaret E. Goertz, 2014-12-17 Sponsored by the Association for Education Finance and Policy AEFPP the second edition of this groundbreaking handbook assembles in one place the existing research based knowledge in education finance and policy with particular attention to elementary and secondary education Chapters from the first edition have been fully updated and revised to reflect current developments new policies and recent research With new chapters on teacher evaluation alternatives to traditional public schooling and cost benefit analysis this volume provides a readily available current resource for anyone involved in education finance and policy The Handbook of Research in Education Finance and Policy traces the evolution of the field from its initial focus on school inputs and revenue sources used to finance these inputs to a focus on educational outcomes and the larger policies used to achieve them Chapters show how decision making in school finance inevitably interacts with decisions about governance accountability equity privatization and other areas of education policy Because a full understanding of important contemporary issues requires inputs from a variety of

perspectives the Handbook draws on contributors from a number of disciplines Although many of the chapters cover complex state of the art empirical research the authors explain key concepts in language that non specialists can understand This comprehensive balanced and accessible resource provides a wealth of factual information data and wisdom to help educators improve the quality of education in the United States *American Civil War, Grades 4 - 7* Cindy Barden,2002-01-01 Provide challenging activities that enable students to explore history geography and social studies topics Activities include word searches fact or opinion creative writing and more Answer keys time lines and suggested reading lists are included
