Linking Optical and Chemical Properties of Dissolved Organic Matter in Natural Waters Christopher L. Osburn, Thomas S. Bianchi, 2017-01-17 A substantial increase in the number of studies using the optical properties absorbance and fluorescence of dissolved organic matter DOM as a proxy for its chemical properties in estuaries and the coastal and open ocean has occurred during the last decade We are making progress on finding the actual chemical compounds or phenomena responsible for DOM s optical properties Ultrahigh resolution mass spectrometry in particular has made important progress in making the key connections between optics and chemistry But serious questions remain and the last major special issue on DOM optics and chemistry occurred nearly 10 years ago Controversies remain from the non specific optical properties of DOM that are not linked to discrete sources and sometimes provide conflicting information The use of optics which is relatively easier to employ in synoptic and high resolution sampling to determine chemistry is a critical connection to make and can lead to major advances in our understanding of organic matter cycling in all aquatic ecosystems The contentions and controversies raised by our poor understanding of the linkages between optics and chemistry of DOM are bottlenecks that need to be addressed and overcome *The Bahamas* International Monetary Fund. Western Hemisphere Dept., 2018-05-14 This Selected Issues paper makes the case for a rules based fiscal framework for The Bahamas and discusses its design calibration and implementation The IMF staff recommends adopting a headline deficit ceiling and a cap on current expenditure growth both calibrated to guide debt toward a suitable medium term anchor while allowing room for stabilization A headline deficit target is simpler to communicate and monitor than a structural balance rule Such a framework would allow expanding capital spending up to the limit provided by the deficit ceiling in the event of improvements in revenue performance Moreover in line with best practices the framework should be anchored around a pre defined medium term debt target that will guide the calibration of proposed operation rules **Resources in Education**
