

History Mark Scheme Paper 1 - Analysis

Q1) What features of the Treaty of Versailles were shared by the other peace treaties of 1919–20?

This is a knowledge recall question, it is asking you to recall information, not explain or make a judgement. Just mention the specific features, factors, details.

Level 1 [1–4 marks] 1 mark for each relevant point; additional mark for supporting detail, maximum 2 marks per point made.

e.g. 'The War Guilt Clause.'

'An obligation to pay reparations.' *

'A need to reduce armaments.' *

'An acceptance of the Covenant of the League of Nations.'

'The defeated countries all lost territory.' *

'All the treaties were diktats.'

*If you gave details of these points you would get the extra mark.

For example, Germany had to pay 6.6bn UKP, whereas Bulgaria had to pay 90million and Hungary 200m gold marks.

Or

Germany's army was restricted to 100,000 men whereas Bulgaria was restricted to 20,000 men and Austria 30,000 men and conscription was not allowed.

So in other words, two detailed factors can get you 4 marks, however, the best option here is just to give 4 specific examples.

Notice this is a "what" question, not a "why", you are not being asked to explain why something happened. That is question 2.

So you could get four marks for saying...

The defeated powers faced similar treatment within the peace settlement. This included the loss of territory, they had to accept the Covenant of the League of Nations, as well as accept the War Guilt Clause. In addition some countries had to pay reparations and all had to reduce the military capacity and disarm.

or

The defeated powers had to pay reparations. For example, Germany had to pay

Chemistry Education and Contributions from History and Philosophy of Science Mansoor Niaz, 2015-12-23 This book explores the relationship between the content of chemistry education and the history and philosophy of science HPS framework that underlies such education It discusses the need to present an image that reflects how chemistry developed and progresses It proposes that chemistry should be taught the way it is practiced by chemists as a human enterprise at the interface of scientific practice and HPS Finally it sets out to convince teachers to go beyond the traditional classroom practice and explore new teaching strategies The importance of HPS has been recognized for the science curriculum since the middle of the 20th century The need for teaching chemistry within a historical context is not difficult to understand as HPS is not far below the surface in any science classroom A review of the literature shows that the traditional chemistry classroom curricula and textbooks while dealing with concepts such as law theory model explanation hypothesis observation evidence and idealization generally ignore elements of the history and philosophy of science This book proposes that the conceptual understanding of chemistry requires knowledge and understanding of the history and philosophy of science Professor Niaz's book is most welcome coming at a time when there is an urgently felt need to upgrade the teaching of science The book is a huge aid for adding to the usual way presenting science as a series of mere facts also the necessary mandate to show how science is done and how science through its history and philosophy is part of the cultural development of humanity Gerald Holton Mallinckrodt Professor of Physics these are valence bond VB and molecular orbital MO theories He emphasizes the importance of having rival theories and interpretations in science and its advancement He further argues that this VB MO rivalry is still alive and together the two conceptual frames serve as the tool kit for thinking and doing chemistry in creative manners The author surveys chemistry textbooks in the light of the how the books preserve or not the balance between the two theories in describing various chemical phenomena This Talmudic

approach of conceptual tension is a universal characteristic of any branch of evolving wisdom As such Mansoor s book would be of great utility for chemistry teachers to examine how can they become more effective teachers by recognizing the importance of conceptual tension Sason Shaik Saeree K and Louis P Fiedler Chair in Chemistry Director The Lise Meitner Minerva Center for Computational Quantum Chemistry The Hebrew University of Jerusalem ISRAEL

Speculative Pedagogies of Qualitative Inquiry Candace R. Kuby, Rebecca C. Christ, 2019-11-13 In *Speculative Pedagogies of Qualitative Inquiry* the authors discuss what inquiry is and how we teach it and if it is even possible to teach With a proliferation of how to manuals for doing qualitative research the time is ripe for a discussion not only on what we teach curriculum but also how we teach pedagogy This book seeks to teach students to become qualitative inquirers not with a formulaic recipe but rather by showing them how to think from a place of uncertain w rest full relational liveliness The authors seek to create qualitative inquiry courses that create spaces that consider our abilities to respond to come to know epistemology be ontology and do axiology qualitative inquiry Thus a main thread of this book is re thinking and re imagining inquiry that they come to conceptualize as in query The authors use both data from graduate level research courses and theoretical concepts from poststructuralism posthumanism and feminist new materialism This book is timely in the face of a growing neoliberal academy that values prescription and repetition over innovation thinking differently and engaging with research It will be an invaluable resource for graduate students looking to use qualitative inquiry in their research
