Humanistic Wellbeing Joar Vittersø,2025-02-12 This open access book seeks to change the way we think about happiness and the good life It starts ambitiously by exploring how the biological question What is life can be integrated with the philosophical question What is good It ends with a radical idea for how scientific reasoning can include a value based theory of the good life Anchored in basic knowledge about human nature the new humanistic theory of wellbeing suggests that a life is good to the extent that it allows us to perform our humanness well The theory further defines a well performed humanness as the fulfilment of three universal human needs the need for stability the need for change and the need to and for care To reach this standpoint the author critically examines major concepts in the wellbeing literature such as values happiness life satisfaction affect hedonia eudaimonia and the good life Based on these reviews the author argues that a science of wellbeing cannot be strictly descriptive and value free A life should not be considered good only because it feels good or is thought of as good for the person living it A good life must also be committed to a universal morality Therefore the humanistic theory of wellbeing suggests that it is good to like one s life but even better to like it for the right reasons

Ten Ways to Weave the World: Matter, Mind, and God, Volume 2 Ross Thompson,2023-01-25 In this sequel to Outgrowing Materialism Thompson explores five conceptual Worlds that preceded the dualist v materialist divide and shows why recent philosophy often little known outside of academic circles is now giving these old ideas a new relevance In an approachable way but without avoiding complexity Embodying Mind leads the reader through the Worlds of panpsychism idealism Aristotelianism emergence and information theory holism and process theology examining the ideas of ethics and God and the difficult questions accompanying each Thompson concludes that causal processes harmonize as in a cosmic counterpoint The world and its beautiful contents form a seamless material whole It is not as if Mind or God glints obscurely through ever narrowing chinks in otherwise seamless nature There are no chinks but the whole is full of Mind Overall imperfectly things are moving towards their sustaining good God is becoming

God surpassing God Embodying Mind can be read independently from Outgrowing Materialism but together the two volumes of Ten Ways to Weave the Word mount a robust wide ranging case that nobody interested in the science v religion debate or wishing more widely for an integrated understanding of Matter Mind and God can afford to ignore **Transforming**
