

PILOT

OPERATION GUIDE

1. Put the marker on 'SAFE' by pushing the on/off switch to the right. The marker is now off. To power on the marker, push the on/off switch to the left. **CAUTION:** with the power on, the electronic circuit board is now powered on and ready to shoot.
2. Cock the marker by pulling the Top Cocking Knob (#173) rearward until it latches. **CAUTION:** if you let go before it latches, your marker may fire.
3. Tighten the air tank until it is snug. If a leak occurs between the tank and the C/A adapter, replace the tank o-ring. **IMPORTANT:** You should never need to use any hand tool to attach a CO₂ / Compressed Air Tank.
4. Install the loader onto the direct feed (#167). Tighten the direct feed screw; fill loader with .48 caliber paintballs only.
5. Please refer to the C.A.M.O. 2.0 mode settings guide to set the R.O.F. on the trigger frame.
6. Turn the marker on by pushing the ON/OFF switch to the left. Then click the Function MODE once to turn off the secondary safety. **CAUTION:** Your marker is ready to fire.
7. Only use lubrication specifically designed for paintball markers. To lubricate your marker, you will need to disassemble your marker. **HELPFUL TIP:** please note how parts are removed from marker as this will ease re-assembly. Remove the Quick Release Pin (#230) and hold down the Striker Pin (#184) and Thumb Adjuster (#187) before you pull the Quick Release Pin (230), as internal parts may be spring-loaded. As you pull the cocking knob out of the receiver, the ACS Venturi Bolt (#30642) and striker (#J218A) will also be removed.
8. Lubricate o-ring #19A with a few drops of paintball oil only.
9. Re-assemble parts back into the marker. **NOTE:** when putting the ACS Venturi Bolt and striker back into the marker, you will need to apply pressure behind the bolt while pushing the movable disc of the coil set (#J218C) forward to the limit at the same time. (right near the battery side grip must be opened) This will allow the bolt and striker to be properly installed back into the receiver.
10. When you are finished shooting the marker, first, unload the marker of all paintballs. **NOTE:** there may be a ball in the receiver; take a couple of shots in a safe direction to make sure that the barrel and receiver are empty. Second, put the barrel plug into the barrel. Put the safety on and slowly unscrew the air source tank. **CAUTION:** do not unscrew the tank valve from the tank. Doing so may cause serious injury or death.
11. Empty the hopper or remove the hopper off the marker to stop the flow of paintballs in the marker.
12. Adjusting the trigger pull - you may adjust the trigger pull on your marker by tuning the major Trigger Adjust Screw (#E300).

FOLLOW THESE STEPS TO ACCESS THE TRIGGER ADJUSTMENT

1. **CAUTION:** Remove all paintballs and CO₂ / Compressed Air Tank before making any adjustment to the Trigger.
2. Using the proper Allen wrench to adjust the Trigger Screw (#E300) located beneath the Trigger Frame in front of the Trigger. Turning this screw clockwise will bring the Trigger closer to the Touch Switch allowing a shorter Trigger travel. Turning counter-clockwise will bring the Trigger away from the Touch Switch for a longer stroke.
3. **NOTE:** Over adjusting the Trigger travel to close to the Touch Switch, can lead to a non active Trigger adjustment.
