Now the wedge shaped portion (22) of the brake lever presses the push rods (13) and (19) against the springs (15) and (16). the push rods are thus forced into the housing.

As a result, the friction pads (4) and (5) in the housing are pressed by the push rods into contact with the ball piston motors (3) and (6) in order to produce the braking force between the backup plates (1), (8) and the reaction plates (2), (7).
