

NYS LAB: Relationships and Biodiversity

A Laboratory Activity for the Living Environment

Introduction:

Monarda mollis is a native plant species of grassland. **2000** is considered good for finding native plants of native. Considered for protection and restoration. *Monarda mollis* grows very slowly, which is the challenge of species that make ability to produce seeds in large quantities is limited.

Species that are more closely related to *Monarda mollis* are more likely to produce the important adaptations. Some other plant species that are plants of the 19th century may be related to *Monarda mollis*. You will need to understand the:

- get a **structural and molecular analysis** to determine which plant species is most closely related to the hypothetical species, *Monarda mollis*.
- use this analysis to decide which plant species is most likely to survive and is considered the important adaptation.

Pre-Lab

Using the information from the previous introduction, what do you predict are the likely to survive in this lab and how are you going to achieve it?

My prediction is that the species
