Morphology

John T. Jensen, 1990-01-01 A self contained and lively text prepared in response to a perceived need for an up to date introduction to the field of morphology within the framework of generative grammar The material is presented in the framework of the lexicalist hypothesis of Chomsky 1970 but also taking in the more recent development of lexicalist

phonology and morphology in the works of Paul Kiparsky and others Other approaches are recognized but the use of one unified consistent theory pushed to its limit makes for a better student text Each chapter includes a list of terms of further reading and a number of exercises The volume is completed by an index

A-Morphous Morphology Stephen R. Anderson,1992-06-25 In A Morphous Morphology Stephen Anderson presents a theory of word structure which relates to a full generative grammar of language He holds word structure to be the result of interacting principles from a number of grammatical areas and thus not localized in a single morphological component Dispensing with classical morphemes the theory instead treats morphology as a matter of rule governed relations minimizing the non phonological internal structure assigned to words and eliminating morphologically motivated boundary elements Professor Anderson makes the further claim that the properties of individual lexical items are not visible to or manipulated by the rules of the syntax and assimilates to morphology special clitic phenomena A Morphous Morphology maintains significant distinctions between inflection derivation and compounding in terms of their place in a grammar It also contains discussion of the implications of this new A Morphous position analysis of word structure

Componential Analysis of Lushai Phonology Alfons Weidert,1975-01-01 The aim of this essay is to present a phonological analysis of Lushai a Tibeto Burman language spoken in the Mizoram province of India in terms of componential features applying as mutation rules to the morphophonological level An analysis of this nature becomes possible if the concepts of phonological extension systems and redundancy free representations are introduced Alongside with the phonemic aspect a semantic analysis of morpheme structure is required yielding the smallest significant units at different morphological or syntactic levels Though based on criteria implying concepts like rule underlying representation and so forth of the standard theory of generative phonology this essay tries to implement the concepts of phoneme on the

phonemic and of morphophoneme on the morphophonological levels and to bring about a methodologically sound classification of phonological rules
