un niveau scientifique notre discipline de **Redefining Regional French** David Hornsby, 2022-10-10 This study challenges the orthodox view that emergent regional varieties of French represent no more than an ephemeral dialect residue of little theoretical interest It follows the life cycle of an obsolescent urban Picard variety spoken in a mining town in the Pas de Calais and attempts to unravel the complex reasons behind the survival of some local variants at the expense of others Applying a sociolinguistic model developed by Peter Trudgill it shows how the processes of levelling and simplification have driven change in a dialect contact situation giving rise to a new stable variety or koine This is compared with other new urban varieties in Sweden and the UK where different economic social and demographic conditions have produced very different linguistic outcomes The emergence of Regional French in the north it is argued may herald the start of a new diversification of French in Europe This book will therefore interest both students of French and of language variation more generally **Dictionnaire universel de la langue française** Désiré Raoul Rochette, Jean François Boissonade, 1819
