LETTRES DE VENTES HYPNOTIQUES EDMOND AMBOS, **TV Lobotomy** Michel Desmurget, 2023-07-04 TV unleashes the imagination and feeds intelligence A child deprived of TV risks social isolation TV dumbs you down TV makes you obese It seems that everything and its opposite has already been said about TV But what is it really How can we distinguish between the radical No TV of some and the supposedly entertaining virtues touted by others Michel Desmurget a doctor in neuroscience has sifted through and synthesized thousands of research articles published over the last fifty years in the most rigorous international journals The conclusion is unequivocal we must stop watching television for good whatever

the program All content even that meant to teach can never come close to any other learning method The data is clear television viewing is detrimental to school performance For a child in elementary school for example every hour spent daily watching television increases the likelihood that he or she will one day leave the school system without any qualifications For specialists there is no doubt that television has a negative influence not only on intellectual development but also on behavior Thus certain eating disorders anorexia bulimia are related to a frantic consumption of television programs In short watching television has an impact on our life expectancy However the harmful impact of this risk is largely underestimated because of the large sector of the public exposed to television more than 85% of Western households have at least one television set and because of a debate on the subject that has become inaudible and confused Moreover the results of the research initiated by the big media groups on the subject remain proprietary i e closed to the general public Believing that we are facing a real public health problem Michel Desmurget wants to act as a responsible scientist with a clear concise and rigorously referenced book the message cannot go unnoticed Michel Desmurget is a doctor of neuropsychology He attended several major American universities MIT Emory UCSF and is now a research director at INSERM in cognitive neuroscience He is particularly interested in the problems of brain organization and plasticity He is the author of the book TV Lobotomy Max Milo 2022 which is based in part on his personal history Exasperated by having to constantly justify the choice not to have television at home and to prevent his children from having access to it and not to be seen as a sociopath in the eyes of those around him he has done a massive job to argue his point

The Neuro-Consumer Anne-Sophie Bayle-Tourtoulou, Michel Badoc, 2020-04-24 Neuroscientific research shows that the great majority of purchase decisions are irrational and driven by subconscious mechanisms in our brains This is hugely disruptive to the rational logical arguments of traditional communication and marketing practices and we are just starting to understand how organizations must adapt their strategies This book explains the subconscious behavior of the neuro consumer and shows how major international companies are using these findings to cast light on their own consumers behavior Written in plain English for business and management readers with no scientific background it focuses on how to adapt marketing and communication to the subconscious and irrational behaviors of consumers the direct influence of the primary senses sight hearing smell taste touch on purchasing decisions and the perception of communications by customers brains implications for innovation packaging price retail environments and advertising the use of nudges and artifices to increase marketing and communication efficiency by making them neuro compatible with the brain's subconscious expectations the influence of social media and communities on consumers decisions when collective conscience is gradually replacing individual conscience and recommendation becomes more important than communication and the ethical limits and considerations that organizations must heed when following these principles Authored by two globally recognized leaders in business and neuroscience this book is an essential companion to marketers and brand strategists interested in neuroscience and vital reading for any advanced student or researcher in this area

Plutôt que de proposer des solutions toutes faites face des stéréotypes, ce livre invite tout d'abord un voyage au cœur des neurosciences et propose ensuite des méthodes scientifiques pour Manager les Y. Organiser l'entreprise en tenant compte des évolutions socio-culturelles. Mesurer la performance économique du capital humain. Il en résulte une proposition de management général de l'entreprise en rupture avec les standards actuels. Les auteurs concluent notamment que l'entreprise Y doit avoir une organisation biologique et non mécaniste permettant de réserver une large place au concept de responsabilité sociale.

Les 7 clés du marketing durable Elizabeth Pastore-Reiss, 2012-02-09 Le développement durable a profondément bouleversé le contexte des entreprises. Firmes internationales et PME doivent désormais intégrer ce changement. Comment dès lors assurer la pérennité de l'entreprise ? Comment réinventer le marketing en l'inscrivant dans une perspective de long terme ? Comment trouver les bons leviers et rendre le marketing durable désirable ? Fruit de dix années d'expérience dans l'accompagnement des entreprises dans la laboration de leur stratégie de développement durable, ce guide pratique répondra aux questions que se posent entrepreneurs et services marketing. Transformer l'essai du marketing durable dans son offre, réduire ses impacts tout en créant de la valeur, faire du développement durable un levier d'innovation de solutions d'avenir et impulser le changement, oui, c'est nécessaire, joyeux et passionnant. S'appuyant sur de nombreux cas d'entreprises qui ont réussi dans cette voie, l'auteure fait ressortir 7 clés de succès et plus de 50 initiatives inspirantes pour mettre en place une façon efficace de vendre des produits et des services plus durables pour tous.

Ré-inventer les marques Jean-Noël Kapferer, 2013-01-03 Le diagnostic de l'expert français des marques. Au moment où chacun s'interroge sur la Marque France, sur notre industrie, sur nos marques, sur les localisations, il est important d'analyser les causes profondes de cette situation. Un certain management des marques n'a-t-il pas valu ? En tous cas, il n'a pas empêché l'ascension des marques de distributeur. Mais en même temps, la marque se diffuse dans toutes les sphères de notre vie publique comme privée. On peut parler de tout, marque. Contradiction. Ou bien, est-ce la notion même de marque qui a changé ? Il faut alors revoir toutes nos méthodes, nos visions. Fort de son expérience de consultant dans tous les secteurs de notre économie et de sa vision mondiale, l'auteur apporte une analyse sans concession sur la situation présente et ses causes. S'appuyant sur de nombreux exemples, il propose des voies et des méthodes nouvelles pour construire des marques plus fortes. En premier lieu pour la Marque France.
