Propst,Jack E. Williams,Kevin R. Bestgen,Christopher W. Hoagstrom,2021-02-15 North American deserts lands of little water have long been home to a surprising diversity of aquatic life from fish to insects and mollusks With European settlement however water extraction resource exploitation and invasive species set many of these native aquatic species on downward spirals In this book conservationists dedicated to these creatures document the history of their work the techniques and philosophies that inform it and the challenges and opportunities of the future A precursor to this book Battle Against Extinction laid out the scope of the problem and related conservation activities through the late 1980s Since then many nascent conservation programs have matured and

researchers have developed new technologies improved and refined methods and greatly expanded our knowledge of the myriad influences on the ecology and dynamics of these species Standing between Life and Extinction brings the story up to date While the future for some species is more secure than thirty years ago others are less fortunate Calling attention not only to iconic species like the razorback sucker Gila trout and Devils Hole pupfish but also to other fishes and obscure and fascinating invertebrates inhabiting intermittent aquatic habitats this book explores the scientific social and political challenges of preserving these aquatic species and their habitats amid an increasingly charged political discourse and in desert regions characterized by a growing human population and rapidly changing climate **Free Speech and Unfree News**

Parchimowicz,2022-11-22 Global systemically important banks G SIBs are the largest most complex and in the event of their potential failure most threatening banking institutions in the world The Global Financial Crisis GFC was a turning point for G SIBs many of which contributed to the outbreak and severity of this downturn The unfolding of the GFC also revealed flaws and omissions in the legal framework applying to financial entities In the context of G SIBs it clearly demonstrated that the legal regimes both in the USA and in the EU grossly ignored the specific character of these institutions and their systemic importance complexity and individualism As a result of this omission these megabanks were long treated like any other smaller banking institutions Since the GFC legal systems have changed a lot on both sides of the Atlantic and global and

national lawmakers have adopted new rules applying specifically to G SIBs to reduce their threat to financial stability This book explores whether the G SIB specific regulatory frameworks are adequately tailored to their individualism in order to prevent them from exploiting overly general rules as they did during the GFC Analyzing the specific character and individualism of G SIBs in relation to their history normal functioning as well as their operations during the GFC this book discusses transformation of banking systems and the challenges and opportunities G SIBs face such as Big Tech competitors climate related requirements and the COVID 19 pandemic Taking a multidisciplinary approach which combines financial aspects of operations of G SIBs and legal analysis the book describes G SIB oriented legal frameworks of the EU and the USA and assesses whether G SIB individualism is adequately reflected analyzing trends in supervisory action when it comes to discretion in the G SIB context all in order to contribute to the ongoing discussions about international banking law its problems and potential remedies to such persistent flaws

A National Trauma Care System National Academies of Sciences, Engineering, and Medicine, Health and Medicine Division, Board on the Health of Select Populations, Board on Health Sciences Policy, Committee on Military Trauma Care's Learning Health System and Its Translation to the Civilian Sector, 2016-09-12 Advances in trauma care have accelerated over the past decade spurred by the significant burden of injury from the wars in Afghanistan and Iraq Between 2005 and 2013 the case fatality rate for United States service members injured in Afghanistan decreased by nearly 50 percent despite an increase in the severity of injury among U S troops during the same period of time But as the war in Afghanistan ends knowledge and advances in trauma care developed by the Department of Defense DoD over the past decade from experiences in Afghanistan and Iraq may be lost This would have implications for the quality of trauma care both within the DoD and in the civilian setting where adoption of military advances in trauma care has become increasingly common and necessary to improve the response to multiple civilian casualty events Intentional steps to codify and harvest the lessons learned within the military's trauma system are needed to ensure a ready military medical force for future combat and to prevent death from survivable injuries in both military and civilian systems This will require partnership across military and civilian sectors and a sustained commitment from trauma system leaders at all levels to assure that the necessary knowledge and tools are not lost A National Trauma Care System defines the components of a learning health system necessary to enable continued improvement in trauma care in both the civilian and the military sectors This report provides recommendations to ensure that lessons learned over the past decade from the military's experiences in Afghanistan and Iraq are sustained and built upon for future combat operations and translated into the U S civilian system

upon the shape and scope of Christian faith within society at large the church and the lives of individuals The study illuminates the dimensions of a largely unheralded gospel message characterized by unimpeded faith that fully accords with the kingdom Jesus stridently proclaimed It outlines the dimensions of faith freed from the disappointing forms of culturalized Christianity that always prove insufficient on a personal level and woefully inadequate to the demands of contemporary life within our globalizing world Today s world can only be effectively impacted through a gospel without borders a compelling gospel most Americans have yet to hear and too many Christians of every cultural and denominational background have yet to fully embrace
