Science, Virtue, and the Future of Humanity Marc D. Guerra, Peter Augustine Lawler, 2015-10-08 *Science Virtue and the Future of Humanity* addresses each of the key public policy issues of our techno future from the perspective of deeply informed and philosophically inclined public intellectuals Among the issues addressed are the detachment of our idea of justice from any credible foundation Tocqueville's prescience on how a cognitive elite might be the aristocracy to be most feared in our time robotization and the possibility of being ruled by morally challenged robots organ markets the degradation of liberal education by obsessive techno enthusiasm biotechnology and biological determinism the birth dearth and the inevitable erosion of our entitlements the possibility that our techno domination is basically an unfolding of the Lockean logic of our foundation and the future of the free exercise of religion in an aggressively libertarian time All in all this book should provoke widespread discussion about the relationship between scientific technological progress and the one true moral spiritual progress that takes place over the course of every particular human life *Handbook of Research on Science Literacy Integration in Classroom Environments* Tai, Chih-Che, Moran, Renee M. R., Robertson, Laura, Keith, Karin, Hong, Huili, 2018-10-12 Secondary schools are continually faced with the task of preparing students for a world that is more connected advanced and globalized than ever before In order to adequately prepare students for their future educators must provide them with strong reading and writing skills as well as the ability to understand scientific concepts The *Handbook of Research on Science Literacy Integration in Classroom Environments* is a pivotal reference source that provides vital research on the importance of cross curriculum discipline connections in improving student understanding and education While highlighting topics such as curriculum integration online learning and instructional coaching this publication explores practices in teaching students how to analyze and interpret data as well as reading writing and speaking This book is ideally designed for teachers graduate level students academicians instructional designers administrators and education researchers seeking current research on science literacy adoption in contemporary classrooms *Human Purpose and Transhuman Potential* Ted Chu, 2014-03-01 For millennia great thinkers have contemplated the meaning and purpose of human existence but while most assumed that humanity was the end point of creation or the pinnacle of evolution Ted Chu makes the provocative claim that the human race may in fact be a means rather than an end that humankind will give rise to evolutionary successors In this wide ranging and authoritative work Chu reexamines the question of human purpose in light of the extraordinary developments of science and technology Arguing that a deep understanding of our place in the universe is required to navigate the magnitude of the choices that lie ahead he surveys human wisdom from both East and West traces the evolutionary trajectory that has led to this point and explores the potentials emerging on the scientific frontier The book addresses the legitimate fears and concerns of playing God but embraces the possibility of transcending biological forms and becoming or creating entirely new life forms **Discovery** Ricki Lewis, 2009-05-11 The goal of *Discovery Science* as a

Window to the World is to relay the excitement of science by exploring selected topics in biology and medicine in a way that reveals the process of discovery. Each chapter will focus on the curiosity and creativity that drives scientists to wonder, observe, question, and experiment. One impetus for this project is the recognition of a growing demand among instructors for a book that departs from fact-stuffed textbooks and instead engages students in the discovery process at a personal level. Emphasizes the process of discovery through interviews and key experiments. Written by a best-selling author. Provides an in-depth conversational look at the science behind several hot topics in biology. Each chapter traces the beginnings of the field with stories of how serendipity and scientific inquiry intertwine. Presents the background to a field by including the scientific literature so the reader does not have to do a literature search or plow through a review article. Many essays introduce the work of overlooked scientists or unsung heroes: Alexey Olovnikov, telomeres, Leroy Steven, stem cells, to name a few. Also, well-known scientists are interviewed: Stanley Miller, Carl Woese, John Gearhart, and others. The essays show how ideas interact and coalesce from different lines of research. Highlights the role of the media in interpreting science for the public.

The Human Genome Project in College Curriculum Aine Donovan, Ronald Michael Green, 2008. Begun formally in 1990, the U.S. Human Genome Project's HGP goals were to identify all the 20,000 to 25,000 genes in human DNA, determine the sequences of the three billion chemical base pairs that make up human DNA, store this information in databases, improve tools for data analysis, and transfer related technologies to the private sector. It was the first large scientific undertaking to address potential issues that arose from project data and opened up vast possibilities for the use of genetic data and the alteration of our genetic makeup. This volume is the first to address the diverse range of ethical issues arising from the HGP and enables professors to bring this critically important topic to life in the classroom.

KNOWCON 2023 Michal Müller, Pavla Slavičková, The publication is the proceedings of the international scientific conference KNOWCON 2023 Knowledge on Economics and Management held by the Department of Economic and Managerial Studies, Palacký University Olomouc on December 7 and 8, 2023. This collection of conference proceedings presents a diverse range of research papers spanning various dimensions of economics and management. It provides insights into the dynamic landscape of contemporary issues and opportunities. The topics explored in these papers encompass a wide spectrum from the impact of reduced value-added tax rates on cultural services as a means of indirect public funding in the creative industries to the analysis of disinvestments in Central and Eastern European countries. Furthermore, the papers delve into areas such as digital transformation of business processes during the COVID-19 crisis, life cycle assessment integration for sustainable decision-making, social entrepreneurship strategies in the context of actual challenges, and the critical role of soft skills for the post-2022 world. This compilation is a testament to the diversity and depth of research in these fields and underscores the importance of multidisciplinary exploration in today's ever-changing global landscape.
