Please write answers in your journal

1. As the opening credits roll, the letters A, T, C and G get highlighted in people's names. Describe the significance of these letters.
2. Write the complimentary strand of DNA nucleotide bases for a segment of DNA with nucleotide base sequence: GATTACA.
3. What is the significance of the spiral staircase in Jerome and Vincent's home?
4. Health benefits provided by employers and health insurance companies help pay for their employees' care if they become ill. Explain how a gene test could be *used against* a prospective employee or someone applying for insurance. How were Vincent's genes used against him in the movie?
5. DNA for genetic testing can be collected from a small amount of blood, hair, saliva, and other body fluids. During a party scene in GATTACA, a woman submits a saliva sample from a recent kiss to screen her potential boyfriend/husband's DNA. Do you think that she was violating his rights by doing this without his knowledge, or is she just protecting herself from choosing an unsuitable partner?
6. How much would a DNA test reveal about someone's personality and intelligence?
7. We witnessed Vincent's parents visiting a doctor who specialized in child conception to select for the best traits for his future brother. The parents hoped that his brother would have the best possible chances for a successful life. Some of the traits mentioned in GATTACA included any possibility of inherited diseases, height, and perhaps intelligence. If you and your partner decide to have a child one day and are given the opportunity to select for special traits, would you do so? Why or why not?
8. What extreme measures is Vincent willing to undertake to achieve his dreams?
9. Discuss the real Jerome "Eugene" Morrow. How is his relationship with Vincent symbiotic? In what ways is perfection both a burden and a curse?
10. A *cautionary tale* attempts to warn the viewer about the flaws of an individual or society. What warning is the film attempting to raise? How does the film do this?

Handbook of Research on Science Literacy Integration in Classroom Environments

Tai, Chih-Che, Moran, Renee M. R., Robertson, Laura, Keith, Karin, Hong, Huili, 2018-10-12 Secondary schools are continually faced with the task of preparing students for a world that is more connected, advanced, and globalized than ever before. In order to adequately prepare students for their future, educators must provide them with strong reading and writing skills, as well as the ability to understand scientific concepts. The Handbook of Research on Science Literacy Integration in Classroom Environments is a pivotal reference source that provides vital research on the importance of cross-curriculum discipline connections in improving student understanding and education. While highlighting topics such as curriculum integration, online learning, and instructional coaching, this publication explores practices in teaching students how to analyze and interpret data, as well as reading, writing, and speaking. This book is ideally designed for teachers, graduate-level students, academicians, instructional designers, administrators, and education researchers seeking current research on science literacy adoption in contemporary classrooms.

Human Dignity in the Judaeo-Christian Tradition John Loughlin,2019-07-11 Dignity is a fundamental aspect of our lives yet one we rarely pause to consider our understandings of dignity on individual collective and philosophical perspectives shape how we think act and relate to others This book offers an historical survey of how dignity has been understood and explores the concept in the Judaeo Christian tradition World renowned contributors examine the roots of human dignity in classical Greece and Rome and the Scriptures as well as in the work of theologians such as St Thomas Aquinas and St John Paul II Further chapters consider dignity within Renaissance art and sacred music The volume shows that dignity is also a contemporary issue by analysing situations where the traditional understanding has been challenged by philosophical and policy developments To this end further essays look at the role of dignity in discussions about transhumanism religious freedom robotics and medicine Grounded in the principal Christian traditions of Catholicism Orthodoxy Anglicanism and Protestantism this book offers an interdisciplinary and cross period approach to a timely topic It validates the notion of human dignity and offers an introduction to the field while also challenging it *Engineering the Human* Bert Jaap Koops,Christoph H. Lüthy,Annemiek Nelis,Carla Sieburgh,J.P.M. Jansen,Monika S. Schmid,2013-02-12 The volume is collection of articles treating the topic of human improvement enhancement from a variety of perspectives philosophical literary medical genetic sociological legal etc The chapters in this volume treat not only those aspects that most immediately come to mind when one thinks of human enhancement such as genetic engineering cloning artificial implants and artificial intelligence etc Somewhat less obvious aspects include evolutionary perspectives in connection with the prolongation of the human lifespan plastic surgery since its beginnings and questions such as whether the distinction between natural and artificial can really be drawn at all and how it has been conceived across the ages or what the legal implications are of recent developments and techniques Many papers make links to the representation of these developments in popular culture from Jules Verne through Aldous Huxley to the movie Gattaca address the hopes and fears that come with them as well as the question how realistic these are While all chapters are written by scientists at the international top of their respective fields all are accessible to a non specialist audience and eminently readable We believe that they represent a state of the art overview of questions that are of interest to a large audience The book thus targets a non specialist audience with an interest in philosophical sociological scientific and legal issues involved in both traditional and recent matters concerning the desire

of mankind to improve itself the human body the human mind and the human condition It is unique in that it brings together all these aspects within a coherent and cohesive collection **Making Sense of Nature** Noel Castree,2013-08-15 We listen to a cacophony of voices instructing us how to think and feel about nature including our own bodies The news media wildlife documentaries science magazines and environmental NGOs are among those clamouring for our attention But are we empowered by all this knowledge or is our dependence on various communities allowing our thoughts sentiments and activities to be unduly governed by others Making Sense of Nature shows that what we call nature is made sense of for us in ways that make it central to social order social change and social dissent By utilising insights and extended examples from anthropology cultural studies human geography philosophy politics sociology science studies this interdisciplinary text asks whether we can better make sense of nature for ourselves and thus participate more meaningfully in momentous decisions about the future of life human and non human on the planet This book shows how nature can be made sense of without presuming its naturalness The challenge is not so much to rid ourselves of the idea of nature and its collateral concepts such as genes but instead we need to be more alert to how why and with what effects ideas about nature get fashioned and deployed in specific situations Among other things the book deals with science and scientists the mass media and journalists ecotourism literature and cinema environmentalists advertising and big business This innovative text contains numerous case studies and examples from daily life to put theory and subject matter into context as well as study tasks a glossary and suggested further reading The case studies cover a range of topics range from forestry in Canada and Guinea to bestiality in Washington State to how human genetics is reported in Western newspapers to participatory science experiments in the UK Making Sense of Nature will empower readers from a wide range of fields across the social sciences humanities and physical sciences **Faith, Film and Philosophy** R. Douglas Geivett,James S. Spiegel,2009-10 THOSE WHO TELL STORIES RULE SOCIETY PLATO So who today are our principal storytellers Not philosophers but filmmakers For those who know both the enormous entertainment potential and the culture shaping power of film this book will stir mind and imagination For great stories freight world sized ideas ideas worthy of contemplation a **Human Flourishing in an Age of Gene Editing** Erik Parens,Josephine Johnston,2019-07-29 International uproar followed the recent announcement of the birth of twin girls whose genomes had been edited with a breakthrough DNA editing technology This technology called clustered regularly interspaced short palindrome repeats or CRISPR Cas9 can alter any DNA including DNA in embryos meaning that changes can be passed to the offspring of the person that embryo becomes Should we use gene editing technologies to change ourselves our children and future generations to come The potential uses of CRISPR Cas9 and other gene editing technologies are unprecedented in human history By using these technologies we eradicate certain dreadful diseases Altering human DNA however raises enormously difficult questions Some of these questions are about safety Can these technologies be deployed without posing an unreasonable risk of physical harm to current and future generations Can all

physical risks be adequately assessed and responsibly managed But gene editing technologies also raise other moral questions which touch on deeply held personal cultural and societal values Might such technologies redefine what it means to be healthy or normal or cherished Might they undermine relationships between parents and children or exacerbate the gap between the haves and have nots The broadest form of this second kind of question is the focus of this book What might gene editing and related technologies mean for human flourishing In the new essays collected here an interdisciplinary group of scholars asks age old questions about the nature and well being of humans in the context of a revolutionary new biotechnology one that has the potential to change the genetic make up of both existing people and future generations Welcoming readers who study related issues and those not yet familiar with the formal study of bioethics the authors of these essays open up a conversation about the ethics of gene editing It is through this conversation that citizens can influence laws and the distribution of funding for science and medicine that professional leaders can shape understanding and use of gene editing and related technologies by scientists patients and practitioners and that individuals can make decisions about their own lives and the lives of their families
