The Economics of Science: A Critical Realist Overview David Tyfield,2013-06-17 Dramatic and controversial changes in the funding of science over the past two decades towards its increasing commercialization have stimulated a huge literature trying to set out an economics of science Whether broadly in favour or against these changes the vast majority of these frameworks employ ahistorical analyses that cannot conceptualise let alone address the questions of why have these changes occurred and why now Nor therefore can they offer much insight into the crucial question of future trends Given the

growing importance of science and innovation in an age of both a globalizing knowledge based economy itself in crisis and enormous challenges that demand scientific and technological responses these are significant gaps in our understanding of important contemporary social processes This book argues that the fundamental underlying problem in all cases is the ontological shallowness of these theories which can only be remedied by attention to ontological presuppositions Conversely a critical realist approach affords the integration of a realist political economy into the analysis of the economics of science that does afford explicit attention to these crucial questions a cultural political economy of research and innovation CPERI Accordingly the book sets out an introduction to the existing literature on the economics of science together with novel discussion of the field from a critical realist perspective In arguing thus across levels of abstraction however the book also explores how concerted engagement with substantive social enquiry and theoretical debate develops and strengthens critical realism as a philosophical project rather than simply applying it Divided into two volumes in this first volume the book explores the top and tail of the argument regarding substantive and philosophical aspects Starting with substantive illustrations we explore the social challenges associated with the contemporary commercialization of science and the movement towards a knowledge based bio economy Having shown the explanatory benefits of assuming a realist political economy perspective the book then turns to the task of reconstructing and justifying that theoretical perspective True to the overall argument regarding attention to ontological presuppositions this starts with critical realism's critique of mainstream economics but also develops critical realism itself towards what may be called a transcendental constructivism

The Anglophone Cameroon Predicament Mufor Atanga, 2011-08-25 This study explores the predicament of Anglophone Cameroon from the experiment in federation from 1961 to the political liberalisation struggles of the 1990s to challenge claims of a successful post independence Cameroonian integration process Focusing on the perceptions and actions of people in the Anglophone region Atanga argues that what has come to be called the Anglophone Problem constitutes one of the severest threats to the post colonial nation state project in Cameroon As a linguistic and cultural minority Anglophone Cameroonians realised that the Francophone led state and government were keener in assimilation than in implementing the federal and bilingual nation agreed upon at reunification in 1960 Calls for national integration became simply a subterfuge for the assimilation of Anglophones by Francophones who dominated the state and government The book details the various measures undertaken to exploit the Anglophone regions economy and marginalise its people Principally the economic structures meant to facilitate self reliant development were undermined and destroyed Institutionalised discrimination took the form of the exclusion of Anglophones from positions of real authority and depriving the region of any meaningful development With the advent of multi party politics most Anglophone Cameroonians increasingly have made vocal demands for a return to a federation in order to adequately guarantee their rights and recognition for them as a political and cultural minority Actively encouraged by France the Francophone led regime in Cameroon has refused to yield to such demands

despite the grave danger of violent conflict and possible secession *Life and Moral Education in Greater China* John Chi-Kin Lee, Stephen Yam-wing Yip, Raymond Ho-Man Kong, 2021-03-30 Arguing for life moral and values education as a bedrock for the original goals of school education this monograph explores how life and values education is conceptualised and imparted in Greater China Under a globalized transnational and technological world where there has been an increase in people's mobility in information and cultural exchanges there is also a growing emphasis on personal and professional ethics Against this context life moral and values education has gained attention for its impact on shaping students' characters as future citizens However the cultivation of these values is made deeply diversified and complex by varying interpretations of life education and values education across societies given that different societies are influenced by different socio-cultural traditions educational ideologies and religious beliefs The means and approaches towards life education also vary vastly from formal school subjects school-based programmes as well as teachers and peers role modelling community services extra-curricular activities school discipline charity work pastoral care and school ethos Recognising this inherent diversity and complexity in the approach to and the dissemination of life education the contributors to this volume survey the practice of life education in Greater China so far suggesting that life education is most effective when it is diversified dynamic and developmental across contexts This book will provide the opportunity for engaging in important and serious debates about the future and the values that will underpin it and will prove of special interest to scholars and practitioners working on education policies curriculum development and teacher education in Greater China
