Gcse 2015 Grade Boundary:

2012 GCSE English results Great Britain: Parliament: House of Commons: Education Committee, 2013-06-11 The 2012 GCSE English results prompted significant controversy which ultimately resulted in an application for judicial review This report sets out the background to these events and identifies lessons to be learned The problems with GCSE English can be traced back to the 2007/09 development phase of the qualification in particular the turbulence which resulted from the shift away from a mostly linear to a modular system combined with a high proportion of controlled assessment and generous marking tolerances Exam board experts raised concerns at the time but these were not acted upon by the regulator the then interim Ofqual Further difficulties arose because of pressures from the school accountability system The problems experienced with GCSE English in 2012 highlighted serious weaknesses in the moderation of speaking and listening with consequences for grade awarding The current status of Ofqual as an independent regulator accountable to Parliament is the right one However the Coalition Government is bringing in wholesale changes to GCSEs and A levels to a tight timetable and at the same time Ofqual must have systems in place The Committee is also concerned that there is a rush towards separate exam systems for England Wales and Northern Ireland without careful reflection on what might be lost or consensus that this is the right thing to do *The Coalition Effect, 2010–2015* Anthony Seldon, Mike Finn, 2015-03-19 The British general election of May 2010 delivered the first coalition government since the Second World War David Cameron and Nick Clegg pledged a new politics with the government taking office in the midst of the worst economic crisis since the 1930s Five years on a team of leading experts drawn from academia the media Parliament Whitehall and think tanks assesses this coalition effect across a broad range of policy areas Adopting the contemporary history approach this pioneering book addresses academic and policy debates across this whole range of issues Did the coalition represent the natural next step in party dealignment and the evolution of multi party politics Was coalition in practice a historic innovation in itself or did the essential principles of Britain's uncodified constitution remain untroubled Fundamentally was the coalition able to deliver on its promises made in the coalition agreement and what were the consequences for the country and the parties of this union

Education in a Federal UK John Furlong, Ingrid Lunt, 2019-10-23 Britain's two recent referenda on Brexit 2016 and on Scottish independence 2014 have raised in the public mind fundamental questions about the future of the UK It seems that for the first time the public the media and the political elite have woken up to the fact that in different parts of the UK there are different histories different aspirations and different imagined futures in relation to a whole range of vitally important political issues But what the public debate often fails to recognise is that in many areas of public life perhaps especially education the UK is already a federal state and in key respects has been so for many years The aim of this volume is therefore to take stock to try and capture what the current state of educational policy and practice is across the whole of the UK This has been achieved by commissioning two different papers from each of the four countries Wales Scotland Northern

Ireland and England The first is an overview exploring the distinctive history principles and current policies of each country The second paper has been specifically chosen as a case study of a key policy that highlights the distinctiveness of each country the Foundation Phase for Wales assessment policy in Scotland shared education initiatives in Northern Ireland and higher education policy in England Taken together these eight papers give an important insight into the complexities of educational policy and practice across the whole of the UK today This volume was originally published as a special issue of Oxford Review of Education *The administration of examinations for 15-19 year olds in England* Great Britain: Parliament: House of Commons: Education Committee, 2012-07-03 Additional written evidence is contained in Volume 3 available on the Committee website at www.parliament.uk/educom **Validity, Reliability and Efficiency of Comparative Judgement to Assess Student Work** Sven De Maeyer, Tine Van Daal, Renske Bouwer, Marije Lesterhuis, Eva Hartell, 2023-01-13

The Taming of Education Rob Creasy, 2017-08-24 This book evaluates contemporary approaches to education with a particular focus on the ways in which assessment shapes the educational experience and influences pupils and students It adopts a critical approach arguing that there is a need for students to develop critical thinking skills be flexible and have the capacity for originality Education has increasingly come to be seen as a process with qualifications as the output however as economies change attaining advantage increasingly relies on creativity and originality Unfortunately in the quest to remove uncertainty from education creativity and originality are often overlooked and the result is that education is impoverished Creasy argues here that there is no single factor that has shaped education and led to this situation rather developments within education can be seen as having been shaped by a range of forces such as neoliberalism New Public Management standardization and internationalization This is not to claim any deliberate undermining of education but the cumulative effect is that education is less and less fit for purpose Written for anyone involved in education student teacher or manager this book draws upon Education Studies Sociology and Social Policy to offer a compelling critique of contemporary education

Teachers Matter - But How? Ninni Wahlström, Daniel Alvunger, Daniel Sundberg, 2019-12-18 Global processes are transforming educational policy around the world in complex ways with different implications for different local arenas Over the last two decades a global neoliberal policy paradigm has emerged placing the teacher at its centre Two well known examples are the OECD report on education and training policy Teachers Matter and the McKinsey Company report entitled How the World s Best Performing School Systems Come Out on Top It now seems more important than ever to highlight some alternatives that might contribute to a broader understanding of the meaning of being a teacher In a time of standardised performance and accountability this special issue raises critical questions about the space for teachers agency and teachers as curriculum agents The different articles from some of our most distinguished researchers in the field provide essential perspectives on the question of where when and how teachers matter Our interest is not primarily to understand the scope of teachers agency but rather to understand what becomes important for teachers in their everyday activities such as teaching students handling educational norms and rules working in a local as well as a global society etc A common theme throughout the articles is that teachers matter in spaces where they can act as moral subjects in their profession in the present drawing on collective and individual experiences of the past whilst imagining a desired future This book was originally published as a special issue of the Journal of Curriculum Studies
