Black Women's Portrayals on Reality Television Donnetrice C. Allison, 2016-01-14 This book critically analyzes the portrayals of Black women in current reality television. Audiences are presented with a multitude of images of Black women fighting, arguing, and cursing at one another in this manufactured world of reality television. This perpetuation of negative, insidious racial and gender stereotypes influences how the U.S. views Black women. This stereotyping disrupts the process in which people are able to appreciate cultural and gender difference. Instead of celebrating the diverse symbols and meaning making that accompanies Black women's discourse and identities, reality television scripts an artificial or plastic image of Black women that reinforces extant stereotypes. This collection's contributors seek to uncover examples in reality television shows where instantiations of Black women's gendered racial and cultural difference is signified and made sinister.

Empowered Educators in Canada Carol Campbell, Ken Zeichner, Ann Lieberman, Pamela Osmond-Johnson, 2017-03-13 BEST PRACTICES FROM CANADA'S HIGH PERFORMING SCHOOL SYSTEMS Empowered Educators in Canada is one volume in a series that explores how high performing educational systems from around the world achieve strong results. The anchor book Empowered Educators: How High Performing Systems Shape Teaching Quality Around the World is written by Linda Darling-Hammond and colleagues with contributions from the authors of this volume. Empowered Educators in Canada details the core commonalities that exist across Canada with special emphasis on the localized nature of the systems, a hallmark of Canadian education. Canada boasts a highly educated population and the provinces/territories truly value education as evidenced by the significant proportion of public funds allocated to schooling. Operated by the provinces and territories, participation in kindergarten, primary, and secondary education is close to 100% across the nation. In addition to offering traditional academics, secondary education includes opportunities for students to attend technical and vocational programs. To demonstrate exemplary education systems, the authors examine two top performing jurisdictions: Alberta and Ontario, which have developed strong supports for teacher development. Canadian teachers are highly qualified and salary scales in all jurisdictions are typically based on a teacher's level of education and years of experience. While Canada has enjoyed much educational success, the education of First Nations students has historically been one of the country's more controversial and contentious issues. Overall, Canada is a country that is proud of its education system and places a high value on and participation in publicly funded education.

Education in Cambodia Vincent McNamara, Martin Hayden, 2022-05-14 This book is the most comprehensive account yet published about the education system in Cambodia. It covers all system levels and draws upon the knowledge and insights of a wide range of leading Cambodian and foreign scholars. The book focuses on how the system has developed and is making progress. Significant achievements over the past two decades are evident, but many problems remain, including the poor quality of teaching, research, and institutional management. Underfunding is an ongoing obstacle, but so too is a bureaucratic culture of resistance to change, a history of weak governance, and an anti-reform sentiment deriving from a teacher-centred

and exam driven curriculum Achieving international standards must now be the system s highest priority To this end the system must rid itself of conservatism complacency and manipulation by parochial vested interests
