Universities Handbook ,2014 **Algorithms and the Assault on Critical Thought** Nancy Ettlinger,2022-12-30 This book examines the digitalization of longstanding problems of technological advance that produce inequalities and automated governance which relieves subjects of agency and critical thought and prompts a need to weaponize thoughtfulness against technocratic designs The book situates digital era problems relative to those of previous sociotechnical milieux and argues that technical advance perennially embeds corrosive effects on social relations and relations of production recognizing variation across contexts and relative to entrenched societal hierarchies of race and other axes of difference and their intersections Societal tolerance despite abundant evidence for harmful effects of digital technologies requires attention The

book explains blindness to social injustice by technocratic thinking delivered through education as well as truths embraced in the data sciences coupled with governance in universities and the private sector that protect these truths from critique Institutional inertia suggests benefits of communitarianism which strives for change emanating from civil society Scaling postcapitalist communitarian values through communitybased peer production presents opportunities However enduring problems require critical reflection continual revision of strategies and active participation among diverse community citizens This book is written with critical geographic sensibilities for an interdisciplinary audience of scholars and graduate and undergraduate students in the social sciences humanities and data sciences
