Colonial merchants created and then expanded their mercantile networks well beyond the confines of the British Empire This trans imperial trade often considered smuggling by British authorities formed the roots of what became known as the American Revolution

Final Report of Working Panels ,1979 **Freedom Ship** Marcus Rediker,2025-05-13 A definitive sweeping account of the Underground Railroad s long overlooked maritime origins from a pre eminent scholar of Atlantic history and the award winning author of The Slave Ship As many as 100 000 enslaved people fled successfully from the horrors of bondage in the antebellum South finding safe harbor along a network of passageways across North America now known as the Underground Railroad Yet imagery of fugitives ushered clandestinely from safe house to safe house fails to capture the full breadth of these harrowing journeys many escapes took place not by land but by sea Deeply researched and grippingly told Freedom Ship offers a groundbreaking new look into the secret world of stowaways and the vessels that carried them to freedom across the North and into Canada Sprawling through the intricate riverways of the Carolinas to the banks of the Chesapeake Bay to Boston s harbors these tales illuminate the little known stories of freedom seekers who turned their sights to the sea among them the legendary abolitionist Frederick Douglass and Harriet Tubman one of the

The Economic History of India, 2023-07-30 The economic history of early India is a rich and diverse area of study covering agricultural developments, trade, markets, occupation and professional groups, urbanization and the institutions that govern the economy. Recent research has expanded our understanding of the processes of transformation of the economy in different temporal contexts within the Indian sub-continent. They have particularly led us to explore connected histories given the trans-continental trading networks and movements of people from very early times. This volume seeks to draw attention to this vast and unexplored terrain in the economic history of early India by bringing together essays on a new and rich historiography. Essays in the volume cover neglected regions, economic processes and structures. Scholars have looked at questions of settlements, crops that were cultivated and market orientation. Essays cover material culture and provide insights into how early Indians lived, what kinds of activities they were engaged in and how they organised their production activities within and outside domestic spaces. Further, the volume brings new insights on hierarchy of settlement types, nature of exchange and the significance of a nodal site in exchange networks. Maritime history as well as the understanding of trade in its varied forms and manifestations are covered in several essays.
