History Alive Reading Challenge Answers For Chapter Two:

Civic Hope Roderick P. Hart, 2018-03-22 Civic Hope is a history of what everyday Americans say in their own words about the government overseeing their lives Based on a highly original analysis of 10 000 letters to the editor from 1948 to the present published in twelve US cities the book overcomes the limitations of survey data by revealing the reasons for people's attitudes While Hart identifies worrisome trends including a decline in writers' abilities to explain what their opponents believe and their attachment to national touchstones he also shows why the nation still thrives Civic Hope makes a powerful case that the vitality of a democracy lies not in its strengths but in its weaknesses and in the willingness of its people to address those weaknesses without surcease The key Hart argues is to sustain a culture of argument at the grassroots level

The Burning Answer Keith Barnham, 2015-05-15 Our society faces a choice We could be enjoying a sustainable lifestyle but we have chosen not to In three generations we have consumed half the oil produced by photosynthesis over eight million generations In two generations we have used half our uranium resources With threats from global warming oil depletion and nuclear disaster we are running out of options Solar power as Keith Barnham says is our necessary solution Barnham explains that the roots of solar energy lie in a little known equation $E = hf$ an equation which was coincidentally celebrated and explained to the world by Einstein in the same year he discovered $E = mc^2$ He alleges that the former equation has been overlooked in favor of the latter much to our detriment and Barnham is here to offer us a solution We can still turn things around and solar energy is the key In this provocative inspiring passionately argued book Keith Barnham outlines actions that any one and all of us can take to make an impact now and on future generations The Burning Answer is a solar manifesto for the new climate aware generation and a must read for climate change skeptics **History Gr11 T/g**, Textbook of
