TECHNICAL SERVICE BULLETIN

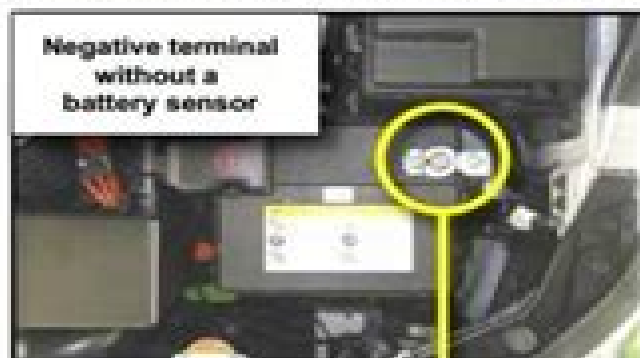

SUBJECT:

INSTALLATION OF ADDITIONAL BATTERY GROUND CABLE CAUTION

This bulletin provides information relating to vehicles equipped with a battery sensor. **This bulletin is issued to emphasize not to install an additional ground cable to the battery** on any vehicles equipped with a battery sensor. Installing an additional ground cable to a battery (-) terminal may cause the battery sensor to incorrectly recognize the battery state (charged/discharged) and temperature information. Therefore, please advise customers not to install an additional battery ground cable, and emphasize the fact **that a vehicle repair caused by the additional battery ground cable will not be covered under warranty.**

Functions of the Battery Sensor

The battery sensor which is embedded on the battery (-) terminal transmits battery voltage and temperature information to the ECM. The ECM controls alternator voltage output necessary for the various vehicle electric units by duty cycle based on signals received from the battery sensor. Also, on some vehicles with the ISG (Idle Stop & Go) function, the Idle stop and auto start are determined by the battery SOC (State Of Charge) and SOH (State Of Health) information received from the battery sensor.
