Soulless Jim DeRogatis,2019-06-04 The essential account of R Kelly s actions and their consequences a reckoning two decades in the making In November 2000 Chicago journalist and music critic Jim DeRogatis received an anonymous fax that alleged R Kelly had a problem with young girls Weeks later DeRogatis broke the shocking story publishing allegations that the R B superstar and local hero had groomed girls sexually abused them and paid them off DeRogatis thought his work would have an impact Instead Kelly s career flourished No one seemed to care not the music industry not the culture at large not the parents of numerous other young girls But for more than eighteen years DeRogatis stayed on the story He was the one who was given the disturbing videotape that led to Kelly s 2008 child pornography trial the one whose window was shot out and the one whom women trusted to tell their stories of a meeting with the superstar at a classroom a mall a concert or a McDonald s that forever warped the course of their lives Soulless The Case Against R Kelly is DeRogatis s masterpiece a work of tenacious journalism and powerful cultural criticism It tells the story of Kelly s career DeRogatis s investigations and the world in which the two crossed paths and brings the story up to the moment when things finally seem to have changed Decades in the making this is an outrageous darkly riveting account of the life and actions of R Kelly and their horrible impact on dozens of girls by the only person to tell it Family Involvement in Children's Education Janie E. Funkhouser,Miriam R. children's learning This idea book is intended to assist educators, parents, and policy makers as they develop school-family partnerships, identifying and describing successful strategies used by 20 local Title I programs. Following an executive summary, the book notes resources for involving families in education, includes research supporting such partnerships, and describes how Title I encourages partnerships. Next, the book describes successful local approaches to family involvement in education, organized around strategies for overcoming common barriers to family involvement, including: 1. overcoming time and resource constraints; 2. providing information and training to parents and school staff; 3. restructuring schools to support family involvement; 4. bridging school-family differences; and 5. tapping external supports for partnerships. Finally, the book presents conclusions about establishing and sustaining partnerships, noting that at the same time that successful partnerships share accountability, specific stakeholders must assume individual responsibility, and that those schools that succeed in involving large numbers of parents invest energy in finding solutions for problems, not excuses. Four appendices present profiles of 10 successful partnerships, descriptions in table format of 20 successful local approaches, contact information for profiled partnership programs, and resources for building successful partnerships. HTH *Mystery in Life* Mark Charles Steffen, 2010-11-22 In our age of knowledge, we can quickly become over-informed while remaining under-developed, long on facts but short on understanding, loaded with data but lacking in practical life-transforming wisdom. This book helps put meat on popular theory bones by addressing the heart behind the curtain of outward life. People today seek purpose and meaning and authentic faith in something larger than themselves that gives hope. Hope leads to healthy human life, which is characterized by joy and wonder. Such healthy life rests on equilibrium between truth and spirit, mind and heart, reason and mystery. But life out of balance is like a wobbly wheel; it seems chaotic and random. This book facilitates an awakening to the spiritual aspects of everyday life, and in so doing, makes us better able to handle what life throws at us each day. Although we will never fully understand or completely enjoy all the holy mysteries available to us, we can learn to do so more and more because, like life, we are dynamic, we are ever growing, changing, and evolving. Readers are led to discover how they can enhance their ability to appreciate and benefit from the mysteries of life. Our world is desperate for hope and joy, which comes from exploring our spirituality. Such hope and joy is available to all. **Raising Frankie** Brenda B. Moody, 2022-03-09 As a college student, he was blessed to become a student intern in the Information Technology (IT) department, where he continued to increase his computer skills as a part-time computer lab assistant and a computer troubleshooter. These roles pushed his skills to a brand new level. After the internship was over, I followed my instructor everywhere he went so I could learn everything I could. After graduating with a degree in computer science, he was offered a part-time job in the IT department. That job later became full-time. Artzt,Frances R. Curcio,2020-08-01 Personal story telling is a powerful and interesting medium through which one can share experiences insights successes and difficulties in meaningful contexts Teaching in general and mathematics teaching in particular is much more than what meets the eye Most people have only experienced teaching from the vantage point of a student and have impressions of teachers and teaching that are simplistic and usually totally incorrect The lives of mathematics teachers are varied and contrary to what one might think they are The journeys of exemplary in service teachers are not linear there are many bends potholes and detours through which they have navigated The road conditions of teaching are fodder for the 12 untold stories collected in this volume whose authors graduated from a special four year undergraduate mathematics teacher preparation program containing innovative components many of which are revealed through the experiences described in their stories The range of narratives vary in every possible way from the reasons they became mathematics teachers to the number of years teaching

to the experiences encountered while teaching to the different roles they have assumed throughout their careers. Nevertheless, one strand permeates all of the stories: their passion for what they do and their ability to reflect on early college experiences that contribute to their performance. These inspiring narratives will shed light on the developmental processes of mathematics teachers: what it means to teach mathematics and the components of a secondary mathematics teacher preparation program that can contribute to their expertise.

Praise for *The Inspirational Untold Stories of Secondary Mathematics Teachers*

This lovely book contains personal stories about the process of becoming a mathematics teacher and the challenges and rewards of the early years of teaching. These stories highlight that the path to teaching is often indirect, rocky, and filled with doubts. But these poignant stories are powerful because they are so honest. I wish I'd read these stories before I experienced some of the joys and challenges of my early years of teaching because they would have prepared me for the roller coaster of emotion associated with entering this complex but beautiful profession. I think these stories will be helpful when working with prospective and early career teachers.

Randolph Philipp, Professor of Mathematics Education, School of Teacher Education, San Diego State University, Immediate Past President, Association of Mathematics Teacher Educators (AMTE)

This is a book about real people and true stories; the narratives are really insightful and truly inspirational. It is not only a book that those involved in teacher preparation programs may find useful and informative to read, but also a book that could provide insights and inspiration to those who are exploring what it is like to be a teacher. The journey of each of these success stories, despite the diverse starting point of each, speaks volumes of the importance of an effective teacher preparation program that not only nurtures but also provides support for the growth of the preservice teachers. The narratives in this book are certainly a testimonial to what we often hear: Teachers are more often made than born.
