

Study Guide Answer Key

Learning Activities

1. c, e, d, a, b
2.
 - a. Dilution and stretching of the cervix
 - b. Reduced uterine blood supply during contractions
 - c. Pressure of the fetus on pelvic structures
 - d. Stretching of the vagina and perineum
3.
 - a. Prelabor changes can help the cervix efface and dilate most readily
 - b. Pelvic size and shape influence how readily a fetus descends; may favor normal fetal position or cause fetus to remain in an unfavorable position.
 - c. Short, intense labor may cause greater pain because each contraction does so much work of effacement, dilation, and fetal descent. Rapid labor limits pharmacologic pain control choices and can make it difficult for a woman to use learned skills to cope with labor.
 - d. Fatigue reduces pain tolerance and reduces the woman's ability to use coping skills that she may have learned.
 - e. Unfavorable fetal presentations or positions (such as occiput posterior) can put added pressure on sensitive areas and can prolong labor.
4. Moderate anxiety or fear heightens a woman's interest in learning pain management techniques. Excessive anxiety reduces uterine blood flow, makes contractions less effective, and increases muscle tension that interferes with the powers of uterine contractions.
5.
 - a. Reduces fear of the unknown that would increase muscle tension and therefore pain; release tension to increase effectiveness of uterine contractions and serve as a distraction.
 - b. Conditioning exercises to prepare the body for birth and relieve discomforts such as back discomfort
 - c. Collect this information about specific classes at your clinical facility.
6.
 - a. Provide pain management before pharmacologic methods can be instituted.
 - b. Provide pain control for pain that remains after medications.
 - c. Realistic option if the woman arrives in advanced labor, too late to give narcotic analgesia or institute an epidural block.
7.
 - a. Relaxation is basic to all other methods, because it releases tension that inhibits normal labor. Relaxation techniques also occupy the mind, providing distraction.
 - b. (1) Adjust environment for comfort; (2) hygienic measures; (3) water therapy; (4) orienting to room and procedures, processes of birth; (5) watch for muscle tension and teaching partner same; (6) change position; (7) specific guidance to relax. See also Box 7-1.
8.
 - a. Breathe slowly, especially when exhaling, breathe into cupped hands, place a moist washcloth over mouth and nose, hold breath for a few seconds before exhaling.
 - b. Blow in short breaths when the urge to push occurs.
9.
 - a. Physician who specializes in anesthesia administration
 - b. Registered nurse who has completed additional schooling and taken a certification test to become an advanced-practice nurse in the administration of anesthesia
10. Narcotic analgesics can cause respiratory depression, usually affecting the newborn. Narcotic administration over 1 hour from birth reduces the amount that would affect the infant at the time of birth. Not often given late in labor as epidural is now preferred.
11. Naloxone (Narcan) is used to reverse respiratory depression, usually in the newborn, caused by maternal opioid drugs. Naloxone is not effective against nonopioid hypoxia. Naloxone can be given IV through a peripheral vein or through the umbilical vein immediately after the baby's birth. Naloxone can be given

Leifer Study Guide Answers

Gloria Leifer, MA, RN, CNE

Leifer Study Guide Answers:

Study Guide for Introduction to Maternity and Pediatric Nursing - E-Book Gloria Leifer, 2022-10-27 NEW Next Generation NCLEX exam style questions for case studies help students develop skills in clinical judgment and prepare for the new licensure examination NEW Updated exercises correspond with the textbook's new content on methods and treatment in the care of women, families, newborns, and children

Introduction to Maternity & Pediatric Nursing - E-Book Gloria Leifer, 2013-11-28 Part of the popular LPN Threads series Introduction to Maternity Pediatric Nursing provides a solid foundation in obstetrics and pediatric nursing. An easy-to-follow organization by developmental stages, discussion of disorders by body system from simple to complex, and health to illness, and a focus on family health make it a complete guide to caring for maternity and pediatric patients. Written in a clear, concise style by Gloria Leifer MA RN, this edition reflects the current NCLEX test plan with additional material on safety, health promotion, nutrition, and related psychosocial care. Cultural Considerations boxes and a Cultural Assessment Data Collection Tool help in developing individualized plans of care. Updated health promotion content includes Health Promotion boxes focusing on preventive strategies for achieving prenatal wellness, health during pregnancy, postnatal health, and pediatric illness prevention and wellness, including the complete immunization schedules for all ages. Nursing Tips provide information applying to the clinical setting. Objectives are listed in each chapter opener. Key terms include phonetic pronunciations and text page references at the beginning of each chapter. Nursing Care Plans with critical thinking questions help you understand how a care plan is developed, how to evaluate care of a patient, and how to apply critical thinking skills. A companion Evolve website includes animations, videos, answers to review questions, and answer guidelines for critical thinking questions, an English/Spanish audio glossary, critical thinking case studies, and additional review questions for the NCLEX examination

Introduction to Maternity and Pediatric Nursing - E-Book Gloria Leifer, 2022-08-31 Build the knowledge and clinical judgment you need to succeed in maternity and pediatric nursing. Written in a clear, easy-to-read style, Introduction to Maternity and Pediatric Nursing 9th Edition describes how you can provide effective, evidence-based care for women during pregnancy, labor, and delivery, and for newborns and growing children. The text spans the continuum of child development, organizing topics from simple to complex and from health to illness. This approach makes it easy to locate information. Another hallmark of the book is its strong focus on family-centered care, health promotion, and illness prevention. Written by noted nursing educator Gloria Leifer, this bestselling text includes new Next Generation NCLEX exam style case studies, plus updates on infection control, pandemic responses, and more. Unfolding case studies follow one family through the conception and birth process and include open-ended critical thinking questions applying the content to practice. More than 25 nursing care plans include nursing diagnoses, plus goals, nursing interventions, and rationales, along with critical thinking questions to promote clinical decision-making skills. Detailed nursing skills cover a wide range of maternal and pediatric nursing interventions. Safety alerts highlight the importance of protecting patients and

others from accidents medication errors and the spread of disease Nursing tips include practical evidence based information applicable in the clinical setting Nursing guidelines reflect the World Health Organization s Baby Friendly Hospital Initiative alternative therapies immunization mandates emergency preparedness preventing medication errors and more Get Ready for the NCLEX Examination at the end of each chapter includes a summary of key points additional online resources review questions and critical thinking questions Cultural Considerations boxes help you address the needs of culturally diverse patients and families Patient Teaching boxes help you communicate instructions for self care with patients and families Medication tables provide quick access to information about commonly used medications NEW Next Generation NCLEX examination style case studies include new format questions to help you prepare for the licensure examination NEW Discussion of the NCSBN Clinical Judgment Measurement Model helps you learn decision making and develop the skills needed to plan effective nursing interventions NEW Thorough updates include infection control pandemic responses pharmacologic tables and pediatric treatments

Introduction to Maternity and Pediatric Nursing Gloria Leifer, MA, RN, CNE, 2014-09-11 Part of the popular LPN Threads series Introduction to Maternity Pediatric Nursing provides a solid foundation in obstetrics and pediatric nursing An easy to follow organization by developmental stages discussion of disorders by body system from simple to complex and health to illness and a focus on family health make it a complete guide to caring for maternity and pediatric patients Written in a clear concise style by Gloria Leifer MA RN this edition reflects the current NCLEX test plan with additional material on safety health promotion nutrition and related psychosocial care provides clinical information and insights in a concise structured and informative way that encourages critical thinking Reviewed by Kim Shrieves on behalf of Nursing Times April 2015 Concise yet comprehensive content is presented within the scope of practice for the LVN LPN but with sufficient depth to facilitate students in a ladder program allowing them to be successful with the ADN program requirements for the specialties Step by step procedure lists throughout the text help you master important maternity and pediatric nursing processes with Skills Performance Checklists available on the Evolve website Nursing Care Plans with Critical Thinking Questions reinforce the nursing process and strengthen problem solving skills as applied to maternity nursing Logical organization of content from simple to complex and health to illness makes locating and accessing information easy Key terms with phonetic pronunciations and text page references help improve terminology and language skills of English as a Second Language ESL students and students with limited proficiency in English before they enter clinical practice Health Promotion boxes emphasize the importance of family centered care health promotion and illness prevention women s health issues and growth and development of child and parent to help you understand and teach wellness and disease prevention to patients in your care Nutrition content highlights the importance of proper nutrition for women before during and after pregnancy for those who are breastfeeding as well as critical information about the nutrition needs and problems of newborns infants and children Nursing Tips throughout provide pertinent information applicable in

the clinical setting that reinforces what you have just learned while building on previously learned information NEW
Unfolding case studies with illustrations follow first time parents Tess and Luis throughout the stages of pregnancy and birth of their twins with a series of critical thinking questions NEW Updated NCLEX exam style review questions have been revised to a higher cognitive level to better reflect the NCLEX examination NEW Expanded coverage of bioterrorism and natural disasters better reflects the evolving role of the nurse in disaster situations NEW Enhanced appendix includes Pediatric Lab Values for quick and easy reference
