*Light* William C. Robertson, 2003 By combining clear explanations clever drawings and activities that use easy to find materials this book covers what science teachers and parents need to know to teach about light with confidence There s also an entire chapter on how the eye works Each chapter ends with a Summary and Applications section that reinforces concepts with everyday examples      **Everyday Physical Science Mysteries** Richard Konicek-Moran, 2013 What can make a ball roll faster Does the temperature of wood affect the heat of a fire How can old fashioned tin can telephones teach today s students about sound and technology By presenting everyday mysteries like these this book will motivate your students to carry out hands on science investigations and actually care about the results The 21 open ended mysteries focus exclusively on physical science including motion friction temperature forces and sound The stories come with lists of science concepts to explore grade appropriate strategies for using them and explanations of how the lessons align with national standards They also relieve you of the tiring work of designing inquiry lessons from scratch      *Uncovering Student Ideas in Science: 25 formative assessment probes* Page Keeley, 2005 Using probes as diagnostic tools that identify and analyze students preconceptions teachers can easily move students from where they are in their current thinking to where they need to be to achieve scientific understanding      *More Everyday Science Mysteries: Stories for Inquiry-Based Science Teaching* Richard Konicek-Moran, 2009-04 Through 15 mystery stories this book memorably illustrates science concepts for students and reinforces the value of learning science through inquiry Each mystery presents opportunities for students to create questions form hypotheses test their ideas and come up with explanations Focused on concepts such as periodic motion thermodynamics temperature and energy and sound these mysteries draw students into the stories by grounding them in experiences students are familiar with providing them with a foundation for classroom discussion and inquiry      *Designing Effective Science Instruction* Anne Tweed, 2009      Exemplary Science In Informal Education Settings: Standards-Based Success Stories Robert E. Yager, 2007-10-04 Just as science education doesn t stop at the schoolhouse door neither should effective application of the National Science Education Standards Exemplary Science in Informal Education Settings shows real world examples of how science education reform has taken hold in museums science centers zoos and aquariums as well as on television radio and the internet This essay collection the fifth volume in the Exemplary Science Monograph Series features 17 informal education programs that were judged to be most successful at increasing participants learning The programs demonstrate how the Standards can be used to inform and improve science education in a wide range of settings and with learners ranging from pre schoolers to older adults      Uncovering Student Ideas in Science: Another 25 formative assessment probes Page Keeley, 2005 V 1 Physical science assessment probes Life Earth and space science assessment probes      Science Scope , 2003      **Middle School Journal** , 2004      *The Science Teacher* , 2007 SCC Library has 1964 cur

two students will watch as Copernicus's systematic observations place the sun at the center of our universe to the dismay of establishment thinkers. After students follow the achievements and frustrations of Galileo, Kepler and Descartes, they will appreciate the amazing Isaac Newton whose discoveries about gravity, motion, colors, calculus and Earth's place in the universe set the stage for modern physics, astronomy, mathematics and chemistry. In the three-book series, master storyteller Joy Hakim narrates the evolution of scientific thought from ancient times to the present. With lively character-driven narrative, Hakim spotlights the achievements of some of the world's greatest scientists and encourages a similar spirit of inquiry in readers. The books include hundreds of color photographs, charts, maps and diagrams, informative sidebars, suggestions for further reading, and excerpts from the writings of great scientists.

*Forces and Motion* Alvin Silverstein, Virginia B. Silverstein, Laura Silverstein Nunn, 2008-09-01 Explains different types of forces, how forces and simple machines work, the laws of motion, and how the laws act in different substances.

Everyday Science Mysteries Richard Konicek-Moran, 2008 The story format is one of the most effective ways to engage students' attention right from the start. Each chapter includes a list of science concepts explored, targeted strategies for using the stories with children in grades K-8, and key matching story concepts with corresponding standards in the National Science Education Standards.

*Preparing for the 2009 International Year of Astronomy* Michael G. Gibbs, Jonathan Barnes, James G. Manning, 2008 Endorsed by the United Nations, UNESCO and the International Astronomical Union, 2009 is designated as the International Year of Astronomy (IYA) and provides a year to celebrate and reflect on 400 years of changing perspectives of the universe. In conjunction with the American Astronomical Society (AAS), the Astronomical Society of the Pacific (ASP) convened an IYA symposium and series of workshops at the AAS summer meeting in St. Louis, Missouri, USA, from May 31 to June 4, 2008. During this conference, astronomy and space science professionals gathered to share ideas and plans, forge connections and collaborations, and organize their efforts to make 2009 a singular year for advancing astronomy awareness and education. This volume contains the content of the meeting plus an additional resource section. It serves as a reference to aid those involved in the IYA as they make professional connections, access resources, and maximize their efforts to encourage the world's citizens to look up and discover anew the universe around us. The Astronomical Society of the Pacific (ASP), founded in 1889, increases the understanding and appreciation of astronomy by engaging scientists, educators, enthusiasts, and the public to advance science and science literacy. Visit [www.astrosociety.org](http://www.astrosociety.org) for additional information regarding the ASP and how you can join the Society and support the cause of improving science literacy.
