**The Psychology of Early Childhood** C.W. Valentine, 2015-06-05 Originally published in 1942 this title attempted to trace from their very earliest appearances after birth all aspects of mental development in childhood up to the age of about 4 or 5 It is based largely on the author s almost daily observations of his own five children over a period of some twenty years supplemented by numerous tests and experiments The first purpose of this

book was to advance our knowledge of the psychology of childhood The importance of such knowledge had become increasingly recognised Even if not all is completely determined in the first 4 5 years there was little doubt by this time that these first years are of profound significance for future development and the better understanding and training of the young child may be at the root of many of our educational and social problems      Compton's Pictured Encyclopedia Guy Stanton Ford,1922      *War Elephants* Sabine Lorca,AI,2025-03-29 War Elephants explores the fascinating history of elephants in ancient warfare highlighting their initial dominance and eventual decline These massive animals often armored and bearing armed riders were once a formidable tactical asset The book reveals intriguing details such as how some cultures invested heavily in elephant domestication and training while others developed specialized anti elephant tactics to neutralize their impact The book progresses chronologically beginning with the natural history of elephants and their suitability for war It then examines their use in significant battles and campaigns from Alexander the Great s encounters to Hannibal s daring crossing of the Alps Finally it analyzes the factors that led to their obsolescence including logistical challenges and new military technologies This study uniquely examines the ecological and economic context surrounding the use of war elephants detailing the resources needed for their upkeep and deployment By combining historical narrative with scientific insights War Elephants provides a comprehensive account of these magnificent creatures as instruments of war appealing to military history enthusiasts and anyone interested in the intersection of humans animals and conflict      Elephant in the Room Kristen Harper,2017-11-30 There s an elephant in the room and in the church Gluttony the sin of eating too much food and eating for the wrong reason The natural consequences of social embarrassment health problems and obesity plague many families these days but no one wants to talk about the underlying respectable sin When Pastor Eric Harvey s family faces a crisis Eric turns to the Bible for perspective and answers What he learns launches his family and his church on a ten week challenge full of laughter and tears prayers and sweat and even coffee and homemade pastries Some members react with anger some with doubt others with enthusiasm like Nick Saint their very own professional Santa Hearts and lives are changed by the gospel of Jesus Christ and by true repentance Some people will lose weight too      **The Seven Vows** Shaun Mehta,2017-10-18 Anand Verma is a recovering alcoholic struggling to overcome his failure as a dutiful son husband and father After being abandoned by his wife to raise his possibly illegitimate child Anands overbearing mother sends him to India to marry Sonia a beautiful yet unhappy stranger whose heart belongs to another Will Anand find his moral compass Will he fulfill his vows Or will he splinter his relationship with his new wife and innocent son by returning to the bottle The Seven Vows is a poignant story of one mans journey to adhere to his cultural values and navigate the complexities of love in order to find redemption purpose and peace      *Collected Works of C.W. **Language in Epistemic Access** Caroline Kerfoot,Anne-Marie Simon-Vandenberg,2018-07-26 This book focuses on how to address persistent linguistically structured inequalities in education primarily in relation to South African schools but also in conversation with Australian work and with resonances for other multilingual contexts around the world The book as a whole lays bare the tension between the commitment to multilingualism enshrined in the South African Constitution and language in education policy and the realities of the dominance of English and the virtual absence of indigenous African languages in current educational practices It suggests that dynamic plurilingual pedagogies can be allied with the explicit scaffolding of genre based pedagogies to help redress asymmetries in epistemic access and to re imagine policies pedagogies and practices more in tune with the realities of multilingual classrooms The contributions to this book offer complementary insights on routes to improving access to school knowledge especially for learners whose home language or language variety is different to that of teaching and learning at school All subscribe to similar ideologies which include the view that multilingualism should be seen as a resource rather than a problem in education Commentaries on these chapters highlight evidence based high impact educational responses and suggest that translanguaging and genre may well offer opportunities for students to expand their linguistic repertoires and to bridge epistemological differences between community and school This book was originally published as a special issue of Language and Education
