Environmental Apocalypse In Science And Art:

Environmental Apocalypse in Science and Art Sergio Fava, 2013 At a time when it is clear that climate change adaptation and mitigation are failing this book examines how our assumptions about valid and usable knowledge are preventing effective climate action Through a cross disciplinary empirically based analysis of climate science and policy the book situates the failures of climate policy in the cultural history of prediction and its interfaces with policy Fava calls into question the current interfaces between scientific research and climate policy by tracing multiple connections between modelling epistemology politics food security religion art and the apocalyptic Demonstrating how the current domination of climate policy by models and scenarios is part of the problem the book examines how artistic practices are a critical location to ask questions differently rethink environmental futures and activate social change The analysis starts with another moment of climatic change in recent western history the overlap of the Little Ice Age and the scientific revolution during which intense climatic scientific and political change were contemporary with mathematical calculation of the apocalypse Dealing with the need for complex answers to complex and urgent questions this is essential reading for those interested in climate action interdisciplinary research and methodological innovation The empirical analyses amount to a methodological experiment across history of science theology art theory and history architecture future studies climatology computer modelling and agricultural policy This book is a major contribution to understanding how we are precluding effective climate action and designing futures that resemble our worst nightmares

Decolonizing Science in Latin American Art Joanna Page , 2021-04-15 Projects that bring the hard sciences into art are increasingly being exhibited in galleries and museums across the world In a surge of publications on the subject few focus on regions beyond Europe and the Anglophone world Decolonizing Science in Latin American Art assembles a new corpus of art science projects by Latin American artists ranging from big budget collaborations with NASA and MIT to homegrown experiments in artists kitchens While they draw on recent scientific research these art projects also decolonize science If increasing knowledge of the natural world has often gone hand in hand with our objectification and exploitation of it the artists studied here emphasize the subjectivity and intelligence of other species staging new forms of collaboration and co creativity beyond the human They design technologies that work with organic processes to promote the health of ecosystems and seek alternatives to the logics of extractivism and monoculture farming that have caused extensive ecological damage in Latin America They develop do it yourself open source commons based practices for sharing creative and intellectual property They establish critical dialogues between Western science and indigenous thought reconnecting a disembodied abstracted form of knowledge with the cultural social spiritual and ethical spheres of experience from which it has often been excluded Decolonizing Science in Latin American Art interrogates how artistic practices may communicate extend supplement and challenge scientific ideas At the same time it explores broader questions in the field of art including the relationship between knowledge care and curation nonhuman

agency art and utility and changing approaches to participation It also highlights important contributions by Latin American thinkers to themes of global significance including the Anthropocene climate change and environmental justice

Apocalypses in Context Kelly J. Murphy, Justin Jeffcoat Schedtler, 2016-09-01 Apocalyptic scenarios remain prevalent and powerful in popular culture in television film comic books and popular fiction in politics in debates on climate change environmentalism Middle East policy and military planning and in various religious traditions Academic interest in apocalypticism is flourishing indeed the study of both ancient and contemporary apocalyptic phenomena has long been a focus of attention in scholarly research and a ready way to engage the religious studies classroom Apocalypses in Context is designed for just such a classroom bringing together the insights of scholars in various fields and using different methods to discuss the manifestations of apocalyptic enthusiasm in different ages This approach enables the instructor to make connections and students to recognize continuities and contrasts across history Apocalypses in Context features illustrations graphs study questions and suggestions for further reading after each chapter as well as recommended media and artwork to support the college classroom

Distributive Justice Debates in Political and Social Thought Camilla Boisen, Matthew C. Murray, 2015-10-23 Who has what and why in our societies is a pressing issue that has prompted explanation and exposition by philosophers politicians and jurists for as long as societies and intellectuals have existed It is a primary issue for a society to tackle this and these answers have been diverse This collection of essays approaches some of these questions and answers to shed light on neglected approaches to issues of distribution and how these issues have been dealt with historically socially conceptually and practically The volume moves away from the more dominating and traditionally cast understandings of distributive justice and shows novel and unique ways to approach distributive issues and how these can help enlighten our course of action and thought today by creating new pathways of understanding The editors and contributors challenge readers by exploring the role and importance of restorative justice within distributive justice exploring the long shadow of practices of trusteeship and concepts of social and individual rights and obligations in welfare and economic systems social protection provision schemes egalitarian practices and post colonial African political thought Distributive Justice Debates in Political and Social Thought empowers the reader to cast a more critical and historically complete light on the idea of a fair share and the implications it has on societies and the individuals who comprise them

Political Thought of Hume and his Contemporaries Frederick G. Whelan, 2014-12-05 Intended for scholars in the fields of political theory and the history of political thought this two volume examines David Hume's Political Thought 1711 1776 and that of his contemporaries including Smith Blackstone Burke and Robertson This book is unified by its temporal focus on the middle and later decades of the eighteenth century and hence on what is usually taken to be the core period of the Enlightenment a somewhat problematic term Covering topics such as property contract and resistance theory religious establishments the law of nations the balance of power demography and the role of unintended consequences in social life

Frederick G Whelan convincingly conveys the diversity and creativity of the intellectual engagements of even a limited set of Enlightenment thinkers in contrast to dismissive attitudes in some quarters toward the Enlightenment and its supposed unitary project Political Thought of Hume and his Contemporaries Enlightenment Projects Vol 1 contains six in depth studies of issues in eighteenth century political thought with an emphasis on topics in normative theory such as property rights the social contract resistance to oppressive government and religious liberty The central figure is David Hume with substantial attention to Edmund Burke Adam Smith and others in the period The introduction situates the studies in the Enlightenment and considers interpretations of that movement *Reconstructing Social Justice* Lauretta Conklin Frederking,2013-11-12 The rhetoric of social justice is commonplace but increasingly it means little more than a tag line or a punctuation point *Reconstructing Social Justice* presents a new framework for social justice that will change the way people think about social justice and change the way people implement social justice This book carves out an intellectual and practical space for social justice that is distinct from political legal and economic spheres While emphasizing a distinct domain for social justice the author then makes sense of its healing role in terms of the polity economy technology and religion Drawing from a rich supply of classroom experiences her research on mosque controversies after September 11 2001 and then the global examples of truth and reconciliation commissions Frederking invites the reader to think about the relevance of social justice from the micro to the macro level Rather than a set of policy outcomes or ideological positions social justice is a process of social accountability that demands honest and transparent engagement While disagreement is likely and controversy inevitable this social justice process reaffirms our connectedness and moves us forward as a collective Phenomenology of Youth Cultures and Globalization Stuart R. Poyntz,Jacqueline Kennelly,2015-02-11 This edited collection brings together scholars who draw on phenomenological approaches to understand the experiences of young people growing up under contemporary conditions of globalization Phenomenology is both a philosophical and pragmatic approach to social sciences research that takes as central the meaning making experiences of research participants One of the central contentions of this book is that phenomenology has long informed critical empirical approaches to youth cultures yet until recently its role has not been thusly named This volume aims to resuscitate and recuperate phenomenology as a robust empirical theoretical and methodological approach to youth cultures Chapters explore the lifeworlds of young people from countries around the world revealing the tensions risks and opportunities that organize youth experiences John Rawls and the History of Political Thought Jeffrey Bercuson,2014-05-16 In this book Jeffrey Bercuson presents the immense and yet for the most part unrecognized influences of Jean Jacques Rousseau and Georg Wilhelm Friedrich Hegel on John Rawls the most important political philosopher of the 20th century While the well documented influence of Immanuel Kant on Rawls is deep and profound Kantian features and interpretation of justice as fairness do not tell the whole story about that doctrine Drawing on Rawls s Lectures on the History of Moral Philosophy and his Lectures on the History of Political Philosophy Bercuson

presents the reader with a more nuanced accurate account of the moral and political philosophy of Rawls in light of these under appreciated influences This new richer image of Rawls s political philosophy shows that Rawls s notion of reasonableness his notion of the kind and extent of our obligations to those fellows with whom we are engaged in social cooperation is conspicuously more demanding and therefore more attractive than most interpreters and critics assume Rawls turns to Rousseau and to Hegel both of whom provide attractive images of engaged citizenship worthy of emulation Written accessibly and contributing to key contemporary debates of global justice this book will be read by scholars within the fields of social and political theory ethics and philosophy

Panarchy Aviezer Tucker, Gian Piero de Bellis, 2015-12-22 Panarchy is a normative political meta theory that advocates non territorial states founded on actual social contracts that are explicitly negotiated and signed between states and their prospective citizens The explicit social contract or a constitution sets the terms under which a state may use coercion against its citizens and the conditions under which the contract may be annulled revised rescinded or otherwise exited from Panarchy does not advocate any particular model of the state or social justice but intends to encourage political variety innovation experimentation and choice With its emphasis on explicit social contracts Panarchy offers an interesting variation on traditional social contract theories Today Panarchist political thought is particularly relevant and interesting in the context of globalization increased international migration the weakening of national sovereignty the rise of the internet cloud as a non territorial locus of political and protopolitical social networks that are not geographic the invention of cryptocurrencies that may replace national currencies and the rise of urban centers where people of many different political identities live and work together This is the first volume to bring together key philosophically and politically interesting yet often overlooked Panarchist texts From the first published translation of de Puydt seminal 1860 article to contemporary Silicon Valley political theory the volume includes Panarchist texts from different eras cultures and geographical regions The amassed wealth of theoretical insight enables readers to compare different texts in this tradition of political thought and distinguish different streams and varieties within this political tradition in comparison with Cosmopolitanism Contractarianism and Anarchism

The Anthropocene in Global Media Leslie Sklair, 2020-11-22 This book offers the first systematic study of how the Anthropocene is reported in mass media globally drawing parallels between the use or misuse of the term and the media s attitude towards the associated issues of climate change and global warming Identifying the potential dangers of the Anthropocene provides a useful path into a variety of issues that are often ignored misrepresented or sidelined by the media These dangers are widely discussed in the social sciences environmental humanities and creative arts and this book includes chapters on how the contributions of these disciplines are reported by the media Our results suggest that the natural science and mass media establishments and the business and political interests which underpin them tend to lean towards optimistic reassurance the good Anthropocene rather than pessimistic alarmist stories in reporting the Anthropocene In this volume contributors explore how dangerous

this neutralizing of the Anthropocene is in undermining serious global action in the face of the potential existential risks confronting humanity The book presents results from media in more than 100 countries in all major languages across the globe It covers the reporting of key environmental issues such as the impact of climate change and global warming on oceans forests soil biodiversity and the biosphere We offer explanations for differences and similarities in how the media report the Anthropocene in different regions of the world In doing so the book argues that though it is still controversial the idea of the Anthropocene helps to concentrate minds and behaviour in confronting ongoing ecological and Coronavirus crises The Anthropocene in Global Media will be of interest to students and scholars of environmental studies media and communication studies and the environmental humanities and all those who are concerned about the survival of humans on planet Earth
