Icons of Space Jelena Bogdanović,2021-07-26 Icons of Space Advances in Hierotopy brings together important scholars of Byzantine religion art and architecture to honour the work of renowned art historian Alexei Lidov As well as his numerous publications Lidov is well known for developing the concept of hierotopy an innovative approach for studying the creation of sacred spaces Hierotopy and the related concepts of spatial icons and image paradigms emphasize fundamental questions about icons including what defines them as structures spaces and experiences Chapters in this volume engage with the overarching theme of icons of space by employing contrasting and complementing methods of hierotopy with more traditional approaches such as iconography Examinations of icons have traditionally been positioned within strictly historical theological socio economic political and art history domains but this volume poses epistemological questions about the creation of sacred spaces that are instead inclusive of multi layered iconic ideas and the lived experiences of the creators and beholders of such spaces This book contributes to image theory and theories of architecture and sacred space Simultaneously it moves beyond colonial studies that predominantly focus on questions of religion and politics as expressions of privileged

knowledge and power This book will appeal to scholars and students of Byzantine history as well as those interested in hierotopy and art history **To Touch the Face of God** Kendrick Oliver, 2013-01-15 Was the space program the signature project of secular modernity or a symbol of humankind's perpetual quest for communion with God In the beginning God created the heavens and the earth In 1968 the world watched as Earth rose over the moonscape televised from the orbiting Apollo 8 mission capsule Radioing back to Houston on Christmas Eve astronauts recited the first ten verses from the book of Genesis In fact many of the astronauts found space flight to be a religious experience **To Touch the Face of God** is the first book length historical study of the relationship between religion and the U S space program Kendrick Oliver explores the role played by religious motivations in the formation of the space program and discusses the responses of religious thinkers such as Paul Tillich and C S Lewis Examining the attitudes of religious Americans Oliver finds that the space program was a source of anxiety as well as inspiration It was not always easy for them to tell whether it was a godly or godless venture Grounded in original archival research and the study of participant testimonies this book also explores one of the largest petition campaigns of the post war era Between 1969 and 1975 more than eight million Americans wrote to NASA expressing support for prayer and bible reading in space Oliver's study is rigorous and detailed but also contemplative in its approach examining the larger meanings of mankind's first adventures in the heavens

Theatrical Space and Historical Place in Sophocles' Oedipus at Colonus Lowell Edmunds, 1996 While Greek tragedies are often studied as works of literature they are less frequently examined as products of the social and political environment in which they were created Rarely too are the visual and spatial aspects of these plays given careful consideration In this detailed and innovative book Lowell Edmunds combines two readings of Oedipus at Colonus to arrive at a new way of looking at Greek tragedy Edmunds sets forth a semiotic theory of theatrical space and then applies this theory to the visual and spatial dimensions of Oedipus at Colonus The book includes an Appendix on the life of Sophocles and the reception of Oedipus at Colonus Edmunds's unique approach to Oedipus at Colonus makes this an important book for students and scholars of semiotics Greek tragedy and theatrical performance

Somaesthetic Experience and the Viewer in Medicean Florence Allie Terry-Fritsch, 2025-10-01 Viewers in the Middle Ages and Renaissance were encouraged to forge connections between their physical and affective states when they experienced works of art They believed that their bodies served a critical function in coming to know and make sense of the world around them and intimately engaged themselves with works of art and architecture on a daily basis This book examines how viewers in Medicean Florence were self consciously cultivated to enhance their sensory appreciation of works of art and creatively self fashion through somaesthetics Mobilized as a technology for the production of knowledge with and through their bodies viewers contributed to the essential meaning of Renaissance art and in the process bound themselves to others By investigating the framework and practice of somaesthetic experience of works by Benozzo Gozzoli Donatello Benedetto Buglioni Giorgio Vasari and others in fifteenth and sixteenth century Florence the book approaches the

viewer as a powerful tool that was used by patrons to shape identity and power in the Renaissance **The Nation and Athenaeum** ,1928 Space and the Postmodern Fantastic in Contemporary Literature Patricia Garcia,2015-04-24 Arising from the philosophical conviction that our sense of space plays a direct role in our apprehension and construction of reality both factual and fictional this book investigates how conceptions of postmodern space have transformed the history of the impossible in literature Deeply influenced by the work of Jorge Luis Borges and Julio Cortázar there has been an unprecedented rise in the number of fantastic texts in which the impossible is bound to space space not as scene of action but as impossible element performing a fantastic transgression within the storyworld This book conceptualizes and contextualizes this postmodern fantastic use of space that disrupts the reader's comfortable notion of space as objective reality in favor of the concept of space as socially mediated constructed and conventional In an illustration of the transnational nature of this phenomenon García analyzes a varied corpus of the Fantastic in the past four decades from different cultures and languages merging literary analysis with classical questions of space related to the fields of philosophy urban studies and anthropology Texts include authors such as Julio Cortázar Argentina John Barth USA J G Ballard UK Jacques Sternberg Belgium Fernando Iwasaki Per Juan José Millás Spain and Ric Faye France This book contributes to Literary Theory and Comparative Literature in the areas of the Fantastic narratology and Geocriticism and informs the continuing interdisciplinary debate on how human beings make sense of space
