Epoxy Terrazzo Mix Designs:

Construction Materials Manuel Bustillo Revuelta, 2021-03-02 Construction Materials is a comprehensive textbook covering all raw materials and products related to the construction processes and not only those applied to building structures. The book is organized to help readers achieve competent knowledge about construction materials. At the beginning of the book, the author offers the general concepts, definitions, and standards adopted worldwide for these materials to be used along the book. The central part of the text covers the primary construction materials required to manufacture concrete and mortars, the most relevant construction materials in the last century. Expressly, concrete and mortar are treated in detail in dedicated chapters per component. In addition, the author addresses other relevant materials in construction such as ceramic materials, metals and alloys, bituminous materials, and geosynthetic materials. Finally, since the construction industry is one of the largest single waste-producing sector in the world, the last chapter outlines the main types and characteristics of construction and demolition waste, e.g., recycled aggregates. The book appeals to students but also professionals interested in construction materials and construction and civil engineering.

The Graphic Standards Guide to Architectural Finishes ARCOM, The American Institute of Architects, 2003-03-24 From ARCOM and The American Institute of Architects. A complete visual guide to choosing and using finish materials. In this unique guide, the authors of MASTERSPEC and Architectural Graphic Standards join forces to offer architects vital single source access to the unbiased information they need to evaluate, select, and specify the best finish materials for any job. This powerful visual resource combines hundreds of illustrations from Architectural Graphic Standards with corresponding building material performance and specification information from AIA's MASTERSPEC published by ARCOM. Use this book during the schematic and design development phases of a project and as an indispensable aid for product selection and specification. Essential for architects, interior designers, and building designers, this vital reference provides information to make informed decisions about specific design goals such as affordability, environmental friendliness, durability, fire resistance, and esthetic success. Features include: Unique source of independent, in-depth building product performance information; the one source that gives you reliable building product information before you consult with manufacturers; Covers a full range of standard finish materials and includes selection criteria, details, typical product sizes, and installation and maintenance data; Provides current standards based on research by government association and independent testing organizations as well as the input of experienced architects and specifiers. Architectural Graphic Standards has served the design community for decades as a virtual bible for architectural detailing. MASTERSPEC Evaluations have long comprised one of the best resources available for building product selection and specification. Consolidating the strong points of both into this new desktop reference is an act of sheer brilliance. Martin M. Bloomenthal, FAIA, CCS, CSI Principal, The Hillier Group, Princeton, New Jersey.
