Scanning Film and Slides

The Perfection 2480 Photo scanner cover has a built-in transparency unit (TPU). To scan film or slides, you'll need to remove the reflective document mat from the cover and place the film in a holder on the scanner glass.

Tip: Make sure your negatives or slides are dust-free for the best scan. You can also select the Dust Removal setting in EPSON Scan to improve your scan.   Dust Removal

1. Lift the scanner cover all the way up and slide the reflective document mat up and off of the scanner cover.

Note: Make sure the transparency unit cable is connected to the back of the scanner.

2. If you're scanning film, slide it into the film holder with the shiny base side facing down. Your images and any wording on the film strip should appear backward on the side that faces up.
