Palloff, Keith Pratt, 2008-11-24 Written by Rena M Palloff and Keith Pratt experts in the field of online teaching and learning this hands on resource helps higher education professionals understand the fundamentals of effective online assessment It offers guidance for designing and implementing creative assessment practices tied directly to course activities to measure student learning The book is filled with illustrative case studies authentic assessments based in real life application of concepts and collaborative activities that assess the quality of student learning rather than relying on the traditional methods of measuring the amount of information retained *Proceedings, ASE*, 2005

Tests and Proofs Gordon Fraser, Angelo Gargantini, 2010-06-29 This volume contains the proceedings of TAP 2010 the 4th International Conference on Tests and Proofs held during July 1-2 in Malaga Spain as part of TOOLS Federated Conferences TAP 2010 was the fourth event of an ongoing series of conferences devoted to the convergence of proofs and tests In the past proving and testing were seen as very different and even competing techniques Proving people would say If correctness is proved what do we need tests for Testers on the other hand would claim that proving is too limited in applicability and testing is the only true path to correctness Of course both have a point but quote Ed Brinksma from his 2009 keynote at the Dutch Testing Day and Testcom FATES Who would want to fly in an airplane with software proved correct but not tested Indeed the true power lies in the combination of both approaches Today modern test systems rely on techniques deeply rooted in formal proof techniques and testing techniques make it possible to apply proof techniques where there was no possibility previously At a time when even mainstream software engineering conferences start featuring papers with both testing and proving in their titles we are clearly on the verge of a new age where testing and proving are not competing but naturally accepted as complementary techniques Albeit we are not quite there yet and so the TAP conferences aim to provide a forum for researchers working on the converging topics and to raise general awareness of this convergence *Every Math Learner, Grades 6-12* Nanci N. Smith, 2017-02-02 As a secondary mathematics teacher you know that students are different and learn differently And yet when students enter your classroom you somehow must teach these unique individuals deep mathematics content using rigorous standards The curriculum is vast and the stakes are high Is differentiation really the answer How can you make it work Nationally recognized math differentiation expert Nanci Smith debunks the myths revealing what differentiation is and isn't In this engaging book Smith reveals a practical approach to teaching for real learning differences You'll gain insights into an achievable daily differentiation process for ALL students Theory lite and practice heavy this book shows how to maintain order and sanity while helping your students know understand and even enjoy doing mathematics Classroom videos teacher vignettes ready to go lesson ideas and rich mathematics examples help you build a manageable framework of engaging sense making math Busy secondary mathematics teachers coaches and teacher teams will learn to Provide practical structures for assessing how each of your students learns and processes

mathematics concepts Design implement manage and formatively assess and respond to learning in a differentiated classroom Plan specific standards aligned differentiated lessons activities and assessments Adjust current instructional materials and program resources to better meet students needs This book includes classroom videos in depth student work samples student surveys templates before and after lesson demonstrations examples of 5 day sequenced lessons and a robust companion website with downloadables of all the tools in the books plus other resources for further planning Every Math Learner Grades 6 12 will help you know and understand your students as learners for daily differentiation that accelerates their mathematics comprehension This book is an excellent resource for teachers and administrators alike It clearly explains key tenants of effective differentiation and through an interactive approach offers numerous practical examples of secondary mathematics differentiation This book is a must read for any educator looking to reach all students Brad Weinhold Ed D Assistant Principal Overland High School

Tests and Proofs Bernhard Beckert, Reiner Hähnle, 2008-03-31 This volume contains the research papers invited papers and abstracts of torials presented at the Second International Conference on Tests and Proofs TAP 2008 held April 9 11 2008 in Prato Italy TAP was the second conference devoted to the convergence of proofs and tests It combines ideas from both areas for the advancement of software quality To prove the correctness of a program is to demonstrate through impeccable mathematical techniques that it has no bugs to test a program is to run it with the expectation of discovering bugs On the surface the two techniques seem contradictory if you have proved your program it is fruitless to comb it for bugs and if you are testing it that is surely a sign that you have given up on any hope of proving its correctness Accordingly proofs and tests have since the onset of software engineering research been pursued by distinct communities using rather different techniques and tools And yet the development of both approaches leads to the discovery of common issues and to the realization that each may need the other The emergence of model checking has been one of the first signs that contradiction may yield to complementarity but in the past few years an increasing number of research efforts have encountered the need for combining proofs and tests dropping the dogmatic

views of their incompatibility and taking instead the best of what each of these software engineering domains has to offer

Agile Processes in Software Engineering and Extreme Programming Alberto Sillitti, Xiaofeng Wang, Angela Martin, Elizabeth Whitworth, 2010-06-03 Interest in agile development continues to grow the number of practitioners adopting such methodologies is increasing as well as the number of researchers investigating the effectiveness of the different practices and proposing improvements The XP conference series has actively participated in these processes and supported the evolution of Agile promoting the conference as a place where practitioners and researchers meet to exchange ideas experiences and build connections XP 2010 continued in the tradition of this conference series and provided an interesting and varied program As usual we had a number of different kinds of activities in the conference program including research papers experience reports tutorials workshops panels lightning talks and posters These proceedings contain full search papers short research papers and experience reports Moreover we have also included in these proceedings the abstracts of the posters the position papers of the PhD symposium and the abstract of the panel This year we had two different program committees for evaluating research papers and experience reports Each committee included experts in the specific area This approach allowed us to better evaluate the quality of the papers and provide better suggestions to the authors to improve the quality of their contributions

Extreme Programming and Agile Methods - XP/Agile Universe 2002 Don Wells, Lauris Williams, 2003-08-02 The second XP Universe and first Agile Universe brought together many people interested in building software in a new way Held in Chicago August 4-7 2002 it attracted software experts educators and developers Unlike most conferences the venue was very dynamic Many activities were not even well defined in advance All discussions were encouraged to be spontaneous Even so there were some written words available and you are holding all of them now We have collected as much material as possible together

into this small volume It is just the tip of the iceberg of course A reminder to us of what we learned the people we met and the ideas we expressed The conference papers including research and experience papers are reproduced in these proceedings Forty one 41 papers were submitted Each submitted paper received three reviews by program committee members The program committee consisted of 40 members Papers submitted by program committee members were refereed separately This ensured that reviewers could provide an honest feedback not seen by the paper submitters In many cases the program committee shepherded authors to significantly improve their initial submission prior to completing the version contained in these proceedings In the end the program committee chose 25 papers for publication 60% acceptance
